Exam Code: 000-071
Exam Name: IBM System x Technical Principles V8
Vendor: IBM
Version: DEMO
Part: A

1: A customer requires a server platform configured with 64GB of memory using 2GB memory DIMMs. Which IBM System x servers meet these requirements?
I.x3800
II.x3850
III.x3950
IV.x3755
A.I & II
B.I & IV
C.II & III
D.II & IV
E.III & IV
Correct Answers: E

2: Which blade servers offer the capability to house two hard drives internally?
I.HS20
II.LS20
III.LS41
IV.HS21XM
A.I, II, and III
B.I, II, and IV
C.I, III, and IV
D.II, III, and IV
Correct Answers: A

3: A customer requires a fault-tolerant disk subsystem for their IBM System x3850 server. They want the highest performance possible, while maintaining complete redundancy including a hot spare and the highest net storage capacity. Which RAID level meets the customer's requirements?
A.RAID-1
B.RAID-5
C.RAID-10
D.RAID-5E
Correct Answers: B

4: If a customer requires high availability and redundancy in IBM System x3950 server's memory subsystem, which technology will meet their requirements?
A.Memory ProteXion
B.XceL4 Cache
C.Chipkill Memory
D.Memory Mirroring
Correct Answers: D

5: A customer has an IBM BladeCenter with ten HS21 Blade servers installed. Currently only
one Ethernet port is available for each server. What is required to enable the second port on each server?
A. Fibre Channel Switch Module
B. Gb Ethernet expansion card
C. Myrinet Cluster expansion card
D. Ethernet Switch Module
Correct Answers: D

6: An enterprise customer with locations world-wide needs to remotely update BIOS and Firmware on their systems. Which function of IBM Director will help this customer?
A. Software Rejuvenation
B. System Maintenance and Update Tool
C. Software Distribution
D. IBM DeployCenter
Correct Answers: C

7: Which storage subsystem supports Windows 2003 cluster service, VMWare ESX server VMotion, and Fibre Channel host connections?
A. DS3200
B. EXP3000
C. DS3400
D. EXP400
Correct Answers: C

8: A customer is concerned about their newly purchased System x server's response time. The installed application is CPU intensive. Which IBM tool should the customer use to identify potential bottlenecks?
A. UpdateXpress
B. Capacity Manager
C. ServerGuide
D. System Availability
Correct Answers: B

9: A customer has 16 IBM Enterprise racks on separate floors with 20 System x3650 servers in each rack. Which KVM switch solution allows the customer to remotely control these servers via a network connection?
A. one Local Console Manager (LCM2) for each rack
B. one Global Console Manager (GCM4) for the entire solution
C. two Global Console Managers (GCM2) for the entire solution
D. five Local Console Managers (LCM2) for the entire solution
Correct Answers: C

10: A customer's application environment requires 32 memory slots to run scientific and technical computing, financial analysis, weather simulation, and life sciences. Which System x server is
intended for this environment?
A.x3550
B.x3655
C.x3455
D.x3755
Correct Answers: D

11: A customer has an x3850 M2 with six 73GB SAS drives installed. They need data protection and at least 300GB of storage. Which RAID level and adapter meets this requirement?
A.RAID-5 and ServeRaid-8i
B.RAID-5 and ServeRaid-8s
C.RAID-5 and ServeRaid-8e
D.RAID-5 and ServeRaid-8k-l
Correct Answers: C

12: Which tool can a technician use to configure the RAID array and install and tune the operating system on a System x server?
A.ServerGuide
B.ipssend utility
C.UpdateXpress
D.ConfigXpert
Correct Answers: A

13: Which Intel-based, System x model supports four 2.5" SAS drives in a 1U form factor?
A.x3250
B.x3455
C.x336
D.x3650
Correct Answers: A

14: A customer wants to run two IBM BladeCenter Chassis. Each chassis has 14 blades, four switches, and four 2000W power supplies. They anticipate that the blades will run at 80-90 percent utilization. They want complete power redundancy. Which Power Distribution Unit (PDU) configuration meets the customer's requirements?
A.one 30a Single-Phase PDU
B.two 30a Single-Phase PDUs
C.one 60a Single-Phase PDU
D.two 60a Single-Phase PDUs
Correct Answers: D

15: Which operating system supports IBM Director Server 5.20?
A.Microsoft Windows XP Professional Edition
B.Microsoft Windows 2003 Server
C.Microsoft Windows NT 4.0 Server
D. Microsoft Windows 2000 Professional

**Correct Answers: B**

16: Which alert notification method does the RSA II SlimLine support?

A. SNMP over modem  
B. E-mail over modem  
C. Serial over LAN  
D. E-mail over LAN  

**Correct Answers: D**

17: Which types of storage use World Wide Names (WWN) to identify devices?

A. iSCSI  
B. SATA  
C. SAS  
D. Fibre Channel  
E. SCSI  

**Correct Answers: D**

18: A customer requires a server that provides spreadsheet, document processing, and presentation graphics programs to thin clients. Which type of server meets these requirements?

A. web server  
B. file server  
C. database server  
D. application server  

**Correct Answers: D**

19: A customer has an existing storage subsystem that consists of IBM System Storage EXP3000 and MegaRAID 8480 adapters. Which server(s) is compatible with this storage subsystem?

A. x3755  
B. x3850  
C. x3950  

**Correct Answers: C**

20: What is the default IP of the RSA II Slimline card?

A. 9.168.70.125
B. 192.168.70.125
C. 9.168.252.1
D. 192.168.252.1

Correct Answers: B
