Exam Code: 000-891
Exam Name: IBM Tivoli Federated Identity Manager V6.1
Vendor: IBM
Version: DEMO
Part: A

1: Which two software components are prerequisite products for the Common Audit and Reporting Service (CARS) event server? (Choose two.)
A. IBM DB2 Server
B. Crystal Enterprise Server
C. IBM Tivoli Directory Server
D. IBM WebSphere Application Server
E. IBM Tivoli Access Manager Authorization Server

Correct Answers: A D

2: Click the Exhibit button.
You want to use TCPMON between the two WS-Provisioning Service instances.
How do you configure the endpoint of the partner WS-Provisioning service (i.e., the destination of step 3) so that TCPMON can be used?

A. modify the ITFIMClientIDL.properties file
B. modify the ITFIMClientScript.constants file
C. use the IBM Tivoli Federated Identity Manager Console to modify a custom runtime parameter
D. use the WebSphere Application Server Administration Console to modify the WS-Provisioning application properties

Correct Answers: C

3: What is the default trace file (for Linux) that is used for the initial debugging of IBM Tivoli Federated Identity Manager Runtime?
4: RBTelco is a large multinational company that outsources health care benefit management to RBBenefits. RBTelco employees access RBBenefits resources through an authenticate-able account at each company. RBBenefit and RBTelco will use SAML V1.0. Which IBM Tivoli Access Manager for e-business (ITAMeb) and IBM Tivoli Federated Identity Manager (ITFIM) components are required to be installed at RBTelco?

A. ITAMeb Runtime, ITAMeb Policy Server, ITAMeb Authorization Server, ITAMeb WebSEAL Server, ITFIM Runtime and Management Services, ITFIM Management Console
B. ITAMeb Runtime, ITAMeb Policy Server, ITAMeb Authorization Server, ITAMeb WebSEAL Server, ITFIM Runtime and Management Services, ITFIM Management Console, WebSEAL Application Developer Kit
C. ITAMeb Runtime, ITAMeb Policy Server, ITAMeb Authorization Server, ITAMeb Java Runtime Environment, ITAMeb WebSEAL Server, ITFIM Runtime and Management Services, ITFIM Management Console, WebSEAL Application Developer Kit

Correct Answers: A

5: Which security token may carry user attribute information as part of the defined token format?

A. Kerberos
B. RACF Token
C. SAML Assertion
D. Username Token

Correct Answers: C

6: You have successfully configured EchoClient and EchoApplication secured by Web Services Security Management (WSSM). You want to test that authorization is correctly being performed on the request. Which technique would allow you to do this?

A. stop all running instances of PDACLID
B. log in to the EchoClient as a different IBM Tivoli Access Manager for e-business (TAMeb) user
C. change the TAMeb ACL policy applying to the Web Services namespace
D. update the authorization module configuration in the Trust Service using the IBM Tivoli Federated Identity Manager Console

Correct Answers: C

7: When designing a system to use WS-Federation, which browser Single Sign-On (SSO) method should be used?

A. Browser GET
B. Browser POST  
C. Browser Artifact  
D. Browser Response  
**Correct Answers: B**

8: When recovering from a disaster, the backup and restore operation you use is similar to the export/import configuration procedure, with one additional step. Which additional step must you take when recovering from a disaster?

A. A new WebSphere profile is required to restore the configuration.  
B. The restored system requires the IBM Tivoli Access Manager for e-business (TAMeb) JRTE to be manually configured against the WebSphere's Java Runtime to allow the IBM Tivoli Federated Identity Manager (ITFIM) Runtime to function properly.  
C. The ITFIM Domain needs to be created manually within the Integrated Solution Console.  
D. The ITFIM Runtime instance needs to be re-registered with the TAMeb policy server by running the SvrSslCfg command.  
**Correct Answers: C**

9: Which XSL if statement checks for the existence of a homepage attribute within an STS Universal User XML structure?

A. `<xsl:if test="//stsuuser:AttributeList/stsuuser:Attribute[@attr='homepage']"/>`
B. `<xsl:if test="//stsuuser:AttributeList/stsuuser:Attribute[@name='homepage']"/>`
C. `<xsl:if-exists="//stsuuser:AttributeList/stsuuser:Attribute/custom:Homepage"/>`
D. `<xsl:if-exists="//stsuuser:AttributeList/stsuuser:Attribute[@name='homepage']"/>`
**Correct Answers: B**

10: Click the Exhibit button.
When planning for secure communications between a partner and the Point of Contact, at what level is the SSL connection defined?
A. each individual partner within a single federation  
B. all federations configured for an instance of IBM Tivoli Federated Identity Manager (ITFIM)  
C. each individual federation within an instance of ITFIM  
D. all federation functionality fronted by a single instance of IBM Tivoli Access Manager for e-business WebSEAL  
**Correct Answers: C**

11: What is the default message level configured for IBM Tivoli Federated Identity Manager?  
A. error messages only  
B. disable all messages  
C. error and warning messages only  
D. info, error and warning messages  
**Correct Answers: D**

12: Click the Exhibit button.  
If an invalid username and password is entered on the EchoClient, which log files will be the first to record this (assuming all components have necessary logging and tracing enabled)?
13: Which utility is used to configure the WebSEAL Server once the files are installed? (Choose one.)
A. pdadmin
B. pdconfig
C. web_config
D. config_web
Correct Answers: B

14: Which two tasks are required to install Service Integration Bus Web Services? (Choose two.)
A. install the Resource Adapter
B. configure SOAP listener port
C. deploy the Service Integration Bus application
D. install the Service Data Objects (SDO) Repository
E. create a new WebSphere Application Server profile
Correct Answers: A D

15: What are two functions of a custom mapping module? (Choose two.)
A. records the token assertion
B. maps a STSUUSER input to a SAML token
A. the PDACLD authentication audit log
B. the EchoClient log during token generation
C. IBM Tivoli Federated Identity Manager (ITFIM) tracing on AppSrv01 during token validation
D. ITFIM tracing on AppSrv03 during an attempted JAAS login
Correct Answers: A
C. looks up attributes in an external data source
D. maps a user's alias during the account linkage operation in SAML 2.0 and Liberty 1.2 protocol
E. maps a GUI XML attributes into UI controls that are used by the IBM Tivoli Federated Identity Manager Console to collect the input data

Correct Answers: A C

16: The configuration of a Web Services Security management (WSSM) Partner allows for the specification of XSL mapping rules. What is the input and output of these XSL mapping rules?
A. The input to the XSL mapping rules of a WSSM Partner is the binary security token as received on the Web Service request. The output of the mapping rules is a new security token ready for use by the Web Service application.
B. The input to the XSL mapping rules of a WSSM Partner is an STSUniversalUser XML document created from the security token received on the Web Service request. The output of the mapping rules is an arbitrary collection of attributes that will be made available to the Web Services application.
C. The input to the XSL mapping rules of a WSSM Partner is an STSUniversalUser XML document created from the security token received on the Web Service request. The output of the mapping rules is a new STSUniversalUser XML document that represents the security token required by the application.
D. The input to the XSL mapping rules of a WSSM Partner is an STSUniversalUser XML document created from the security token received on the Web Service request. The output of the mapping rules is an IBM Tivoli Access Manager for e-business credential that will be used to authorize the partner's access to the Web Service application.

Correct Answers: C

17: What limitations exist for a SAML Partner Provider ID configured at the Identity Provider?
A. The Provider ID can be any string.
B. The Provider ID can only include alphanumeric characters.
C. The Provider ID must match the prefix of Target URLs in SSO requests.
D. The Provider ID must match the Succinct ID configured at the Service Provider.

Correct Answers: C

18: What are three functions of a WebSphere Node Agent? (Choose three.)
A. monitors performance
B. manages JVM memory
C. serves J2EE applications
D. manages the deployment manager
E. manages configuration synchronization
F. routes administrative requests to servers

Correct Answers: A E F

19: Which statement is true about a Dynamic Chain Selection Module instance?
A. It is the first module in the partner module chain in Web Services Security Management (WSSM).
B. It is the last module in the partner module chain in WSSM.
C. It is the first module in the application module chain for partner.
D. It is the last module in the application module chain for the partner.

Correct Answers: B

20: What must be done after adding a partner to a Federated-Single Sign-On (F-SSO) Federation to allow the partner's users to Single Sign-On (SSO)?
A. restart WebSEAL
B. enable the Partner
C. stop/restart IBM Tivoli Directory Server
D. restart Integrated Solutions Console (ISC)

Correct Answers: B
