Exam Code: 000-907
Exam Name: IBM TotalStorage Productivity Center V3.3 Implementation
Vendor: IBM
Version: DEMO
Part: A

1: In addition to the IBM 3494, what other tape library devices are supported by TotalStorage Productivity Center V3.3?
   A. IBM 3582
   B. IBM 3492
   C. IBM 3583
   D. IBM TS3310
   Correct Answers: D

2: What is needed to integrate TotalStorage Productivity Center V3.3 with the customer's SNMP manager?
   A. the IP address or the hostname of the SNMP manager
   B. nothing, TPC will automatically recognize the SNMP event manager
   C. Data Manager ? Alerting, then right click the Filesystem Alert node and select Create Alert
   D. edit the <TPC_install_dir>/device\snmp\tpcevnt.opt options file with the event manager server name
   Correct Answers: A

3: The customer key requirements include data monitoring and chargeback. The customer has over 100 Windows servers with over 10TB of local and SCSI attached storage. Which components of TotalStorage Productivity Center V3.3 (TPC) should be recommended?
   A. TPC for Data
   B. TPC for Data and TPC for Disk
   C. TPC for Data and TPC for Fabric
   D. TPC for Data, TPC for Fabric, and TPC for Disk
   Correct Answers: A

4: Which statement about CIM/OM agents is correct?
   A. Two or more storage device vendors can share a single CIM/OM agent.
   B. Multiple CIM/OM agents can share the same TCP/IP port on the same server.
   C. Data Manager and Disk Manager must have separate CIM/OM agents for a device.
   D. A CIM/OM agent is required for every vendor storage device that you want to collect configuration data.
   Correct Answers: D

5: Which steps should be performed, once a CIM/OM is configured and discovered?
   A. run the probe
   B. ping the CIM/OM agent to trigger re-registration and rediscovery
   C. restart the CIM/OM agent to trigger registration or discovery again
   D. verify or specify Port, Username, Password and Password Confirm, Interoperability Namespace, Protocol, and perform Test Connection. Run the discovery.
   Correct Answers: A
6: Given the customer requirements to monitor ESS storage subsystems, which product can be replaced by TCP V3.3?
   A. Expert
   B. DSCLI
   C. NetView
   D. IT Director
   Correct Answers: A

7: When estimating the size of the Agent Manager registry database, which factor should be taken into consideration?
   A. OS type
   B. numbers of agents
   C. number of GUI clients
   D. local or remote database
   Correct Answers: B

8: Which command can be used to verify that the correct version of DB2 is installed on an AIX server for TotalStorage Productivity Center V3.3?
   A. db2ver
   B. db2level
   C. db2 ersiondb2 ?ersion
   D. db2 connect to sysdb; db2 "select * from rellevel"; db2 connect reset
   Correct Answers: B

9: What is the default common agent registration password?
   A. manager
   B. changeMe
   C. passw0rd
   D. password
   Correct Answers: B

10: What must be installed on a Windows 2003 Server before installing Agent Manager 1.3.2 to support TPC V3.3?
   A. SLP
   B. CIM/OM
   C. Java 1.4.2
   D. Tivoli Common Agent
   Correct Answers: C

11: Which service should be checked to verify that the TotalStorage Productivity Center V3.3 Data Server started on the Windows platform?
   A. IBM Tivoli Common Agent Data Server
   B. IBM TotalStorage Productivity Center Data Server
12: Which three steps must be completed before running a probe for Storage Subsystems? (Choose three.)
A. run a Data scan
B. run Fabric discovery
C. run an Agent discovery
D. run a CIM/OM discovery
E. add CIM/OM login information
F. run second CIM/OM discovery
Correct Answers: D E F

13: What conditions must be met to perform Storage Subsystem Performance monitoring?
A. The device has been pinged, and a monitor started.
B. The CIM/OM is discovered and the device has been probed.
C. The CIM/OM is discovered, the device has been probed, and a monitor started.
D. A fabric agent is installed in the desired zone and the device CIM/OM is discovered.
Correct Answers: C

14: What is the main purpose of the SLP directory agents?
A. to work around the multicast limitations
B. to allow TPC to discover CIM/OMs in a different subnet
C. to avoid the need for multiple hosts/servers for CIM/OM Agents
D. to reduce the network traffic load during the performance data collection
Correct Answers: B

15: The customer is currently using TPC to forward SNMP traps to NetView. What must be done in TPC to ensure SNMP traps are also sent to an Omnibus server?
A. discover the Omnibus server using Out of Band Discovery
B. add the IP address of the Omnibus server as SNMP Destination 2 in the Alert Disposition panel
C. disable the existing SNMP Manager in the Alert Disposition panel and add the Omnibus server to the configuration
D. forward SNMP Traps from Omnibus to the other SNMP trap server because TPC can send SNMP traps to only one destination
Correct Answers: B

16: What is required to generate a report on a SQL Database?
A. TPC database report generator is installed.
B. Microsoft SQL Server management agent is installed.
C. TotalStorage Productivity Center V3.3 Data Agent is installed on the server hosting the database.
D. TotalStorage Productivity Center V3.3 Database Agent is installed on the server hosting the
Correct Answers: C

17: A CIM/OM discovery job fails each night because new CIM/OM agents are being added. How can you eliminate the failure and stop the agents from being added?
A. add the CIM agents to the SLP using the exclude parameter
B. disable the scan of the local subnet in the CIM/OM Discovery job
C. use the Topology Viewer to remove the CIM agents from the database
D. configure each failing CIM agent so that it successfully connects, then select Remove CIM/OM to delete it permanently

Correct Answers: B

18: A company has two TPC Servers named A and B, and needs to create a rolled up report showing all computers monitored by both TPC Servers. On TPC Server A, a definition for TPC Server B is created under the Administrative Services -> Data sources -> TPC Servers. What else must be done before the rolled up report can be generated?
A. The rollup service must be started.
B. A CIM/OM discovery must be run against TPC Server B.
C. A TPC Server probe must be defined and run against TPC Server B.
D. A TPC Server discovery job must be defined and run against TPC Server B.

Correct Answers: C

19: What job would be run to identify files that require backup through Tivoli Storage Manager?
A. Ping
B. Scan
C. Probe
D. Discovery

Correct Answers: B

20: What access does a user have if they are not assigned membership to any role?
A. The user will have no access.
B. The user will have "Disk Operator" access by default.
C. The user will have "Data Operator" access by default.
D. The user will have "TPC Administrator" access by default.

Correct Answers: A
