   A. check the available licenses
   B. upgrade the Java version on the Webtop Server
   C. make sure you have the latest version of native desktop
   D. check the number of events returned for each Active Event List (AEL)
   E. try connecting to Webtop from different workstations to see if it is a workstation issue
   F. do a count on the number of rows in the status, journal and details table in the ObjectServer
   **Correct Answers: D E F**

5: A customer wants a web page within IBM Tivoli Netcool/Webtop V2.0 (Webtop) that provides internal links to various help topics. The page would be accessible using links in certain pages in Webtop, or by adding the word "MyHelp" after the hostname and port specification in the URL (for example, http://server:8080/webtop/MyHelp). The customer already has the page designed and built (called index.html), and just needs your help putting in the right place. What is the first step you should take to accomplish this using Webtop's Page Manager?
   A. upload the customer file to the server using the Add File to Dir button
B. create a subdirectory under the Custom directory using the New Dir button
C. create a directory called MyHelp under the webroot (/ in gui) directory using the New Dir button
D. create a directory called MyHelp under the webroot (/ in gui) directory using the Create New Subdirectory button

Correct Answers: C

6: In order to provide Groups for use within Webtop, the Group creator needs to be which type of user?
A. Webtop Administrator
B. Netcool GUI Foundation Administrator
C. Netcool Security Manager Administrator
D. Webtop User with NGF read/write privileges

Correct Answers: B

7: You have configured and started IBM Tivoli Netcool/Webtop V2.0. It is not connecting to the ObjectServer. What should you try?
A. check the webtop.log
B. alter system shutdown
C. select count(*) from alerts.status
D. telnet to one of the network devices to see if it has the community string is set to public

Correct Answers: A

8: Which directory should you backup if you want to store copies of pages IBM Tivoli Netcool/Webtop V2.0 serves to connected clients?
A. ${NCHOME}/webtop/webapps/
B. ${NCHOME}/guifoundation/pages/webtop
C. ${NCHOME}/guifoundation/webtop/pages
D. ${NCHOME}/guifoundation/webapps/webtop

Correct Answers: D

9: Security requirements for a customer IBM Tivoli Netcool/Webtop V2.0 (Webtop) deployment require all clients to access the ObjectServer using SSL communications. Which three actions must be taken to ensure SSL communications? (Choose three.)
A. import the signed certificate into a local keystore
B. use the keytool utility to create a digital certificate
C. connect to Webtop using http:<servername>:8443
D. make the certificate available from a public web server
E. define the SSL port information in $NCHOME/guifoundation/conf/server.xml
F. define the SSL port information in $NCHOME/guifoundation/config/server.init

Correct Answers: A B E

10: The customer requires a view that includes the following information based on the default ObjectServer:
Where the event originated
Details of the type of failure
Whether the event was a problem or resolution
When the event was updated by any source
The view should be sorted by descending severity and then the most recent occurrence.
Which fields and sort criteria will meet the customers needs?
A.Fields: NodeAlias, AlertKey, Type, StateChange.
Sort: Severity(desc), LastOccurrence(desc)
B.Fields: Node, AlertGroup, AlertKey, Type, StateChange.
Sort: Severity(desc), LastOccurrence(desc)
C.Fields: Node, Summary, Type, StateChange, LastOccurrence.
Sort: Severity(asc), LastOccurrence(asc)
D.Fields: NodeAlias, AlertGroup, AlertKey, Type, LastOccurrence
Sort: Severity(desc), FirstOccurrence(asc)
Correct Answers: B

11: You have configured your ObjectServer, 'DISP_01', and it is running. Next you started IBM Tivoli Netcool/Webtop V2.0 (Webtop). There are no events showing up in Webtop, and in the log file you see that it cannot connect to server NCOMS. What should you check first?
A.telnet NCOMS
B.nco_ping NCOMS
C.cat $NCHOME/etc/omni.dat
D.ncwDataSourceDefinitions.xml
Correct Answers: D

12: What must always be the first line of text in an HTML page containing SMARTPage commands?
A.< SMARTPAGE >
B.<html:start_SMARTPAGE >
C.<head type=SMARTPAGE >
D.<!-- enable:SMARTPAGE -->
Correct Answers: D
