500-006 92 Questions Implementing Cisco TelePresence Video Solution, Part 2

Exam Code: 500-006
Certification: Cisco Specialist
Posted: 2017-06-05
http://www.aoowe.com

Question 1
Which Cisco TelePresence VCS function is used to enable H.323 endpoints to connect to SIP endpoints?
A. zones
B. subzones
C. TURN
D. interworking

Correct Answer: D
Explanation/Reference:

Question 2
How will FindMe help a user working from either home or the office?
A. Anyone can contact the user using a single identity.
B. Users can locate any individual in the company using the address book.
C. Users can change their system names according to their current location.
D. Anyone can contact the user by giving each endpoint the same configuration.

Correct Answer: A
Explanation/Reference:

Question 3
When can a transform rule be applied on a Cisco TelePresence VCS?
A. searches, inter-zone and inter-subzone calls
B. searches and inter-zone calls
C. searches and inter-subzone calls
D. inter-zone and inter-subzone calls

Correct Answer: B
Explanation/Reference:
answer is genuine.

**Question 4**
What does the hop count setting on the firewall traversal configuration limit on the Cisco TelePresence VCS?
A. The number of Cisco TelePresence VCSs that a call can travel through.
B. The number of firewalls that a call can travel through.
C. The number of routers that a call can travel through.
D. The number of switches that a call can travel through.

Correct Answer: A
Explanation/Reference: valid answer.

**Question 5**
What are the consequences of only setting up one neighbor zone?
Two Cisco TelePresence VCSs are not configured with DNS. What are the consequences of only setting up one neighbor zone?
A. Calls can only be made in one direction.
B. All searches will fail between neighbors.
C. Calls are not possible between neighbors.
D. Registrations are not possible.

Correct Answer: A
Explanation/Reference:

**Question 6**
Which Cisco TelePresence VCS function can you use to control the speed of a call within the same subzone?
A. links
B. pipes
C. per-call bandwidth
D. default bandwidth

Correct Answer: C
Explanation/Reference:

**Question 7**
Endpoints can be placed into different Cisco TelePresence VCS (X5 or above) subzones according to which of the following?
A. aliases or IP addresses
B. aliases and MAC addresses
C. IP addresses only
D. aliases, MAC addresses, and IP addresses

Correct Answer: A
Explanation/Reference:
trustful answer.

Question 8
Where should you look on Cisco VCS to troubleshoot?
Calls from Cisco VCS registered endpoints are not reaching Cisco Unified Communications Manager registered endpoints. Where should you look on Cisco VCS to troubleshoot?
A. NTP settings
B. Search history
C. SNMP trap logs
D. Cisco Unified Presence configuration

Correct Answer: B
Explanation/Reference:

Question 9
When trunking a Cisco VCS to Cisco Unified Communications Manager, what value should the Where should you look on Cisco VCS to troubleshoot?
When trunking a Cisco VCS to Cisco Unified Communications Manager, what value should the A. 323 mode be set to?
B. On
C. Off
D. Auto
E. Best Effort

Correct Answer: B
Explanation/Reference:
real answer.

Question 10
How many peers can you configure per neighbor zone?

A. 1
B. 2
C. 3
D. 4
E. 5
F. 6
G. 8
H. 12

Correct Answer: E
Explanation/Reference:
Okay.
Question 11
Where do you change the Maximum Session Bit Rate for Video Calls?
A. Device > Trunk
B. System > Location
C. Media Resources > Media Resource Group
D. System > Enterprise Parameters
E. System > Region

Correct Answer: E
Explanation/Reference:
Explanation:

Question 12
Where do you find the Clusterwide Domain Configuration?
A. System > Enterprise Parameters
B. System > Enterprise Phone Configuration
C. Device > Trunk
D. User Management > SIP Realm

Correct Answer: A
Explanation/Reference:
ALL right.

Question 13
Which menu on the Cisco TelePresence VCS should you refer to in order to verify that an endpoint has registered?
A. Application
B. Status
C. Security
D. Configuration

Correct Answer: B
Explanation/Reference:
exact answer.

Question 14
Which Cisco TelePresence C Series Codec command will move the on-screen display to monitor output 4?
A. configuration video osd output: 4
B. xconfiguration video osd output: 4
C. command video osd output: 4
D. xcommand video osd output: 4
Correct Answer: B
Explanation/Reference:
answer is reliable.

Question 15
Which user groups on the Cisco TelePresence VCS are available for LDAP integration?
A. administration and FindMeTM users
B. administration and supervisor users
C. supervisor users and client users
D. client users and FindMe users

Correct Answer: A
Explanation/Reference:

Question 16
Which Cisco TelePresence C Series Codec command will move the on-screen display to monitor output 4?
A. configuration video osd output: 4
B. xconfiguration video osd output: 4
C. command video osd output: 4
D. xcommand video osd output: 4

Correct Answer: B
Explanation/Reference:
answer is reliable.

Question 17
What should you use to back up the configuration of a Cisco TelePresence VCS (X5 software or above)?
A. the backup and restore tool
B. the serial port and the backup command
C. the serial port and the xbackup command
D. SCP to download the file called “backup.tft”

Correct Answer: A
Explanation/Reference:
answer is genuine.

Question 18
What should you use to back up the configuration of a Cisco TelePresence VCS (X5 software or above)?
A. the backup and restore tool
B. the serial port and the backup command
C. the serial port and the xbackup command
D. SCP to download the file called “backup.tft”

Correct Answer: A
Explanation/Reference:
answer is genuine.

**Question 19**
How can you independently restore the default links on a Cisco TelePresence VCS?
A. with an xcommand from the API
B. by performing a factory reset
C. from the bandwidth configuration section of the web interface
D. by performing a reboot

Correct Answer: A
Explanation/Reference:
answer is definite.

**Question 20**
What will happen if the local zone on a Cisco TelePresence VCS does not have a search rule?
A. Calls to locally registered devices will fail.
B. Calls from locally registered devices will fail.
C. Calls to externally registered devices will fail.
D. Calls from externally registered devices will fail.

Correct Answer: A
Explanation/Reference:
answer is real.

**Question 21**
How many digital video inputs does a Cisco TelePresence Codec C40 have?
A. 2
B. 0
C. 1
D. 3
E. 5

Correct Answer: D
Explanation/Reference:
Best answer.

**Question 22**
How else might you attempt the upgrade?
You are having trouble upgrading the Cisco TelePresence C Series Codec system using the web
interface. How else might you attempt the upgrade?
A. Use the API command interface.
B. Use the HTTP or HTTPS Interface.
C. Use the menus and a USB drive.
D. Use the remote ISDN connection.

Correct Answer: B
Explanation/Reference:
answer is outclass.

**Question 23**
Which two items should you check on the local Cisco TelePresence C Series Codec when audio is not received?
Which two items should you check on the local Cisco TelePresence C Series Codec when audio is not received? (Choose two.)
A. The microphone is plugged in.
B. The microphone is turned on in the menus.
C. The volume on the monitor is turned up.
D. The far end is sending audio.

Correct Answer: CD
Explanation/Reference:
particular answer.

**Question 24**
What can an engineer check in order to determine if the camera remote control or the system is causing the problem?
The camera remote control is not responding. What can an engineer check in order to determine if the camera remote control or the system is causing the problem?
A. The monitor is on the right channel.
B. The switch inside the remote control is switched on.
C. The light flashes on the camera when a key is pressed.
D. The batteries are correctly placed within the remote.

Correct Answer: C
Explanation/Reference:
to the point answer.

**Question 25**
What are the two possible causes?
After you change the IP address of a Cisco TelePresence Codec C90, you are unable to use Telnet or a browser to connect to that address. However, you are able to use ping to connect to the new address. What are the two possible causes? (Choose two.)
A. The configuration failed and there is another device with the same address that responds to the ping.
B. The codec disabled the Telnet and HTTP services after the IP address change.
C. The codec needs to reboot after the IP address change in order to bind the services to the new address.
D. The gatekeeper configuration failed and you need to set up the gatekeeper address and the discovery type again.
Correct Answer: AC
Explanation/Reference:
*answer is authentic.*

**Question 26**
Which three areas can the Cisco VCS be configured to use an external policy server?
In which three areas can the Cisco VCS be configured to use an external policy server? (Choose three.)
A. CLI policy
B. interworking configuration page
C. search policy
D. call policy
E. registration policy
F. Conference Factory
G. Cisco Unified Presence configuration page

Correct Answer: CDE
Explanation/Reference:
Explanation:

**Question 27**
Which three areas can the Cisco VCS be configured to use an external policy server?
In which three areas can the Cisco VCS be configured to use an external policy server? (Choose three.)
A. CLI policy
B. interworking configuration page
C. search policy
D. call policy
E. registration policy
F. Conference Factory
G. Cisco Unified Presence configuration page

Correct Answer: CDE
Explanation/Reference:
Explanation:

**Question 28**
What information about a change can you determine from the configuration log on a Cisco TelePresence VCS?
What information about a change can you determine from the configuration log on a Cisco TelePresence VCS?
A. the E.164 alias of the person who made the change
B. the IP SIP address of the person who made the change
C. the H.323 ID of the person who made the change
D. the username of the person who made the change

Correct Answer: D
Explanation/Reference:
Explanation:
Question 29
Which feature must be enabled on the Cisco TelePresence VCS in order to monitor the status of non-presence-enabled clients?
A. Presence User Agent
B. interworking
C. FindMe?
D. LDAP

Correct Answer: A
Explanation/Reference: reliable answer.

Question 30
How can you independently restore the default links on a Cisco TelePresence VCS?
A. with an xcommand from the API
B. by performing a factory reset
C. from the bandwidth configuration section of the web interface
D. by performing a reboot

Correct Answer: A
Explanation/Reference: answer is definite.

Question 31
What will happen if the local zone on a Cisco TelePresence VCS does not have a search rule?
A. Calls to locally registered devices will fail.
B. Calls from locally registered devices will fail.
C. Calls to externally registered devices will fail.
D. Calls from externally registered devices will fail.

Correct Answer: A
Explanation/Reference: answer is real.

Question 32
Which option is related to the error “Unable to communicate with the TMS Provisioning Extension service”?
A. The correct option key is not installed.
B. HTTPS is not configured.
C. The certificate is invalid.
D. Cisco TMSPE service needs to be restarted or is not running.
Correct Answer: D
Explanation/Reference:
Okay.

**Question 33**
What should you use to back up the configuration of a Cisco TelePresence VCS (X5 software or above)?
A. the backup and restore tool
B. the serial port and the backup command
C. the serial port and the xbackup command
D. SCP to download the file called “backup.tft”

Correct Answer: A
Explanation/Reference:
*answer is genuine.*

**Question 34**
Which menu on the Cisco TelePresence VCS should you refer to in order to verify that an endpoint has registered?
A. Application
B. Status
C. Security
D. Configuration

Correct Answer: B
Explanation/Reference:
*exact answer.*

**Question 35**
What should the administrator check on the Cisco TelePresence Conductor?
A user complains that their rendezvous conference fails to connect. What should the administrator check on the Cisco TelePresence Conductor?
A. NTP is working correctly.
B. The auto-dialed participant is defined for that user.
C. H.323 is enabled on the System Administration page.
D. The conference bridge has an Active status.

Correct Answer: D
Explanation/Reference:
*answer is accepted.*

**Question 36**
Which logs can you view?
In the Cisco TelePresence Conductor web pages, which logs can you view?
A. system log, event log, and CDR log
B. system log and event log  
C. event log and configuration log  
D. system log, event log, configuration log, and CDR log  

Correct Answer: C  
Explanation/Reference:  
particular answer.

**Question 37**  
Which mechanism does the Cisco TelePresence Conductor use to communicate with the call control device?  
Which mechanism does the Cisco TelePresence Conductor use to communicate with the call control device?  
A. It sends keepalive messages until the H.245 negotiations are completed.  
B. It provides a secure FTP channel to use for data transfer.  
C. When Cisco TelePresence Conductor receives the signaling for the call, it uses CPL.  
D. A SIP connection will use the B2BUA of Cisco TelePresence Conductor.  

Correct Answer: D  
Explanation/Reference:  

**Question 38**  
When configuring a conference alias for a meeting type template, which role should be applied?  
When configuring a conference alias for a meeting type template, which role should be applied?  
A. Video User  
B. Chairman  
C. Administrator  
D. Participant  
E. Attendee  

Correct Answer: D  
Explanation/Reference:  
answer is up to dated.

**Question 39**  
Which configuration step must be completed for Cisco TelePresence Conductor to communicate with a Cisco TelePresence Server?  
Which configuration step must be completed for Cisco TelePresence Conductor to communicate with a Cisco TelePresence Server?  
A. Create a bridge pool and place the TelePresence Server in that pool.  
B. Enable SNMP on the TelePresence Server.  
C. Set the TelePresence Server to locally managed mode.  
D. Create a unique username and password on the TelePresence Server with administrator access only.  

Correct Answer: A  
Explanation/Reference:  
answer is justified.
Question 40
Which two of the following are supported ways to install Cisco TelePresence Conductor?
A. Purchase the appliance with the application already installed.
B. Install the application on Windows 2008.
C. Install the application on a Cisco supported VMware ESXi host.
D. Enable Cisco TelePresence Conductor under the Application menu in the Cisco VCS.

Correct Answer: AC
Explanation/Reference:
answer is true.

Question 41
How many conferencing bridges can a single full-capacity Cisco TelePresence Conductor support?
A. 1
B. 10
C. 15
D. 25
E. 30
F. 104
G. 500
H. 2400

Correct Answer: E
Explanation/Reference:
complete answer.

Question 42
Which three endpoints are provisioned by Cisco TMSPE?
A. Cisco TelePresence System MX Series
B. Cisco TelePresence System EX Series
C. Cisco Unified IP Phone 9971
D. Cisco Unified IP Phone 7960
E. Cisco TelePresence System CTS 500

Correct Answer: ABE
Explanation/Reference:

Question 43
Which option is related to the error “Unable to communicate with the TMS Provisioning Extension service”?
A. The correct option key is not installed.
B. HTTPS is not configured.

Correct Answer: B
Explanation/Reference:
C. The certificate is invalid.
D. Cisco TMSPE service needs to be restarted or is not running.

Correct Answer: D
Explanation/Reference:
Okay.

Question 44
What should be done to determine the cause of the failure?
If provisioning replication fails for any reason, what should be done to determine the cause of the failure?
A. Re-install the Cisco Jabber Video client and try again.
B. Run all diagnostic tests on the TMS PE Diagnostics page.
C. Capture Cisco TelePresence Jabber Video logs and find the problem.
D. Run a Wireshark trace on the communication between the Cisco Jabber Video client and the Cisco VCS.

Correct Answer: B
Explanation/Reference:
valid answer.

Question 45
Which three directory services can import Cisco TMS users?
Which three directory services can import Cisco TMS users? (Choose three.)
A. Active Directory
B. Active Directory with Kerberos (Secure AD)
C. Novell eDirectory
D. Lightweight Directory Access Protocol

Correct Answer: ABD
Explanation/Reference:
answer is modified.

Question 46
What are the minimum required configuration settings for the provisioning Root folder?
What are the minimum required configuration settings for the provisioning Root folder?
A. phone book URI, presence server URI, SIP server address
B. Maximum In bandwidth, Maximum Out bandwidth, SIP server address
C. network DNS domain name, Maximum In bandwidth, Maximum Out bandwidth
D. network IPv4 address, network DNS domain name, SIP server address

Correct Answer: A
Explanation/Reference:
confirmed answer.

Question 47
Which four licenses and option keys are required in order to provision and register a Cisco Jabber Video for TelePresence client?
Which four licenses and option keys are required in order to provision and register a Cisco Jabber
Video for TelePresence client? (Choose four.)
A. Cisco TMS: Jabber Video capacity option key
B. Cisco TMS: direct managed system licenses
C. Cisco Jabber: user licenses
D. Cisco VCS: Device Provisioning option key
E. Cisco VCS: Registration license

Correct Answer: ABDE
Explanation/Reference:
Explanation:

Question 48
What are the system components of provisioning?
What are the system components of provisioning?
A. Cisco VCS, Cisco TMS, and Cisco Jabber
B. Cisco VCS and Cisco TMS
C. Cisco VCS, Cisco TMS, and Cisco TMSPE
D. Cisco VCS, Cisco Unified CM, Cisco TMSPE
E. Cisco VCS, Cisco Unified CM, Cisco TMS, and Cisco TMSPE

Correct Answer: C
Explanation/Reference:
exact answer.

Question 49
The following Cisco TMS warning is displayed. "No route possible between X and Y." What does this warning indicate?
The following Cisco TMS warning is displayed. "No route possible between X and Y." What does this warning indicate?
A. One of the endpoints is not registered on the Cisco TP VCS.
B. There is a restriction that does not allow calls between zones.
C. TMS cannot find one of the selected systems.
D. Gateway is not available.

Correct Answer: B
Explanation/Reference:

Question 50
Which three operating systems can you install Cisco TMS?
On which three operating systems can you install Cisco TMS? (Choose three.)
A. Windows Server 2003 SP1 or later, 32-bit
B. Ubuntu 12.04 LTS
C. RHEL
D. Windows Server 2008 SP2 or later, Standard 32-bit and 64-bit
E. Windows Server 2008 R2 SP1 or later, Standard 64-bit
F. Windows Server 2003 R2
G. Solaris
H. CentOS

Correct Answer: ADE
**Question 51**
Which setting will enable you to monitor the conference? Refer to exhibit.
Exhibit:

You started a conference without Cisco TMS and you want to monitor the conference. Which setting will enable you to monitor the conference?
A. Show MCUs
B. Show Ad Hoc
C. Expand the Active folder
D. Expand the Reservations folder
E. Add to Watch List

Correct Answer: B
Explanation/Reference:

**Question 52**
What happens if Cisco TelePresence VCS Control only has an ‘AnyIPAddress’ search rule configured in the traversal zone?
A. All calls from the Expressway won’t work
B. All calls to the Expressway won’t work  
C. Calls dialed with an alias from the Expressway won’t work  
D. Calls dialed with an alias to the Expressway won’t work  

Correct Answer: D  
Explanation/Reference:  
*answer is absolutely Okay.*

**Question 53**  
Which is the recommended method for backing up and restoring the SQL database?  
Which is the recommended method for backing up and restoring the SQL database?  
A. The TMS Tools application on the Cisco TMS server  
B. The SQL command-line editor  
C. Microsoft SQL Server Manager Studio Express  
D. SQL command-line scripting  

Correct Answer: C  
Explanation/Reference:  
*Excellent answer.*

**Question 54**  
All Cisco TMS users and administrators are members of which default group?  
All Cisco TMS users and administrators are members of which default group?  
A. users  
B. video unit administrator  
C. site administrator  
D. administrator  

Correct Answer: A  
Explanation/Reference:  

**Question 55**  
What is the purpose of the ISDN and the IP zones in Cisco TMS?  
What is the purpose of the ISDN and the IP zones in Cisco TMS?  
A. To configure the neighboring of gatekeepers  
B. To configure subzones, links, and pipes in gatekeepers  
C. To display systems correctly in the map mode  
D. To perform call routing  

Correct Answer: D  
Explanation/Reference:  
*to the point answer.*

**Question 56**  
Which persistent setting other than system name, E.164 alias, and H.323 ID is configurable for a personal video system?  
Which persistent setting other than system name, E.164 alias, and H.323 ID is configurable for a personal video system?  
A. SIP URI
B. MAC address
C. serial number
D. IP address

Correct Answer: A
Explanation/Reference:
Explanation:

Question 57
What occurs when a conference with eight sites is booked through Cisco TMS?
A. TMS will automatically choose the most appropriate MCU that is available on the network.
B. TMS will prompt the engineer to book an MCU on the network.
C. TMS will cascade the call by using the built-in MultiSite capabilities of the endpoints.
D. TMS will automatically activate Multiway.

Correct Answer: A
Explanation/Reference:

Question 58
Which two pieces of troubleshooting information does the Cisco TCS provide? (Choose two.)
A. log messages that can be accessed by the site manager through the CLI
B. recording alias processing progress
C. error logs that only Cisco TAC can access
D. log messages that can be accessed by the site manager through the web interface

Correct Answer: BD
Explanation/Reference:

Question 59
Which two statements about Cisco TCS users are true? (Choose two.)
A. Users with the creator role can create their own recording aliases.
B. Local users have only limited Cisco TCS permissions.
C. Users can be assigned to the Cisco TCS through an Active Directory LDAP server.
D. User permissions are based on one of three assignable roles.

Correct Answer: CD
Explanation/Reference:
Explanation:

Question 60
Which of these constitutes a Cisco TCS recording alias?
A. a recording template, a media server configuration, and a call configuration
B. a media server configuration and a call configuration
C. a recording template and a media server configuration
D. a recording template and a call configuration

Correct Answer: A
Explanation/Reference:

**Question 61**
What is the effect of registering the Cisco TCS with the Cisco VCS using H.323 gateway mode?
A. The Cisco TCS does not support this type of registration.
B. An unlimited number of recording aliases can be assigned.
C. The Cisco TCS is prevented from making an outbound call to a Cisco MCU.
D. The Cisco TCS can traverse calls between SIP and H.323.

Correct Answer: B
Explanation/Reference: 
answer is confirmed.

**Question 62**
What is required for Cisco TelePresence Server to communicate with Cisco WebEx, using the PSTN?
A. Cisco TelePresence MCU 5300
B. Cisco 3420 ISDN Gateway
C. third-party interop key
D. Web Conferencing feature key

Correct Answer: C
Explanation/Reference: 
Explanation:
Topic 5, Deploying TelePresence Content Server

**Question 63**
Which two configuration steps must be completed for this to function correctly?
A Cisco 5310 MCU is being configured as an ad hoc conference bridge in Cisco Unified Communications Manager. Which two configuration steps must be completed for this to function correctly? (Choose two.)
A. Install the Cisco Unified Communications Manager feature key on the MCU.
B. Create a SIP trunk from Cisco Unified Communications Manager to the MCU.
C. Enable Media Port Reservation on the MCU.
D. Disable H.323 and enable SIP on the MCU.

Correct Answer: CD
Explanation/Reference:

**Question 64**
When the administrator enables remotely managed mode on the Cisco TelePresence Server, which statement is correct?

Correct Answer: A
Explanation/Reference: 

A. Cisco TelePresence Conductor can communicate with the TelePresence Server.
B. Cisco TMS is able to gather CDR data.
C. SNMPv3 is used as a secure communication channel to the management device.
D. Cisco Unified Communications Manager can communicate with the TelePresence Server.

Correct Answer: A
Explanation/Reference:
Explanation:

Question 65
Which three protocols does Cisco TelePresence Server support?
Which three protocols does Cisco TelePresence Server support? (Choose three.)
A. SCCP
B. H.323
C. H.460
D. TIP
E. SIP

Correct Answer: BDE
Explanation/Reference:
Explanation:

Question 66
Which three methods can an engineer use to upgrade the software on the Cisco TelePresence MCU?
Which three methods can an engineer use to upgrade the software on the Cisco TelePresence MCU? (Choose three.)
A. web interface
B. FTP
C. flash drive
D. SSH
E. serial interface
F. RMA the unit
G. Telnet

Correct Answer: ABC
Explanation/Reference:

Question 67
What may cause this problem?
A Cisco TelePresence MCU Auto Attendant does not allow users to set up ad hoc conferences, even though the media port reservation setting is off.

What may cause this problem?
A. The streaming option was selected instead of the ConferenceMe? option.
B. The global conference setting, auto-attendant, is not set up correctly.
C. The user endpoint does not have MultiSite? installed.
D. The auto-attendant has not been set up correctly.

Correct Answer: D
Explanation/Reference:
Explanation:

**Question 68**
How do you know that all blades on the Cisco TelePresence MSE 8000 have booted correctly?
A. The logo will light up.
B. The lights on the fan tray will turn green.
C. The light in the supervisor blade will turn green.
D. Alarm lights come on.

Correct Answer: B

**Question 69**
Which command is used to set the IP configuration for a Cisco TelePresence MCU?
A. status
B. xconfigure
C. static
D. set

Correct Answer: C

**Question 70**
Why would an endpoint stop sending 720p in a call with a Cisco TelePresence MCU?
A. The endpoint Ethernet speed renegotiated at half-duplex.
B. The Cisco TelePresence MCU is using video to receive bit rate optimization to request a lower bandwidth.
C. Another endpoint joined the conference, which brought the conference rate down.
D. Another endpoint failed in its negotiation with the Cisco TelePresence MCU.

Correct Answer: B

**Question 71**
Which global conference settings allow the customer to do this?
A customer wants to allow users to create ad hoc conferences by dialing the Cisco TelePresence MCU service prefix of 8, followed by a number for the conference. Which global conference settings allow the customer to do this?
A. Media port reservation: Disabled | Incoming calls to unknown conferences or auto attendants: Create new ad hoc conference | Register ad hoc conferences with gatekeeper: On
B. Media port reservation: Enabled | Incoming calls to unknown conferences or auto attendants: Default auto attendant | Register ad hoc conferences with gatekeeper: Off
C. Media port reservation: Enabled | Incoming calls to unknown conferences or auto attendants:
Create new ad hoc conference | Register ad hoc conferences with gatekeeper: Off
D. Media port reservation: Disabled | Incoming calls to unknown conferences or auto attendants:
Default auto attendant | Register ad hoc conferences with gatekeeper: On

Correct Answer: A
Explanation/Reference:
most suitable answer.

Question 72
What software can you use to customize the banner on the Cisco TelePresence MCU?
What software can you use to customize the banner on the Cisco TelePresence MCU?
A. SSH terminal client
B. web browser
C. WinSCP client
D. customization software

Correct Answer: B
Explanation/Reference:
agree with the answer.

Question 73
What does an endpoint system use to navigate the Auto Attendant menu on the Cisco TelePresence MCU?
What does an endpoint system use to navigate the Auto Attendant menu on the Cisco TelePresence MCU?
A. FECC and DTMF navigation
B. a special remote that came with the Cisco TelePresence MCU
C. only FECC, DTMF is not supported
D. web interface of the endpoint

Correct Answer: A
Explanation/Reference:
Explanation:

Question 74
What does an MCU service prefix of 8 mean for users of a Cisco TelePresence MCU?
What does an MCU service prefix of 8 mean for users of a Cisco TelePresence MCU?
A. Any conferences created from an endpoint will be prefixed with 8.
B. Any dialed number starting with 8 will be routed to the MCU.
C. Any gateway services will be prefixed with an 8.
D. Any MCU-created conferences will start with an 8.

Correct Answer: B
Explanation/Reference:
agree with the given answer

Question 75
What two protocols are used in firewall traversal?
What two protocols are used in firewall traversal? (Choose two).
A. SIP
B. H.239
C. H.460.18 & 19
D. Assent
E. H.264

Correct Answer: CD
Explanation/Reference:

**Question 76**
Which three dial strings will match the search rule?
A Cisco VCS has a search rule that uses the pattern string of ([78]d1d+|Meet..*). Which three dial strings will match the search rule? (Choose three.)
A. meet.richard
B. 7881000
C. Meet.Richard
D. 8881888
E. 781
F. 781.meet.richard
G. 881000

Correct Answer: ACG
Explanation/Reference:

**Question 77**
Which three areas can the Cisco VCS be configured to use an external policy server?
In which three areas can the Cisco VCS be configured to use an external policy server? (Choose three.)
A. CLI policy
B. interworking configuration page
C. search policy
D. call policy
E. registration policy
F. Conference Factory
G. Cisco Unified Presence configuration page

Correct Answer: CDE
Explanation/Reference:

**Question 78**
How many Cisco VCSs can be in a single cluster?
How many Cisco VCSs can be in a single cluster?
A. 1
B. 2
C. 3
D. 4
E. 5
F. 6
Correct Answer: F
Explanation/Reference: answer is valid.

**Question 79**
What needs to be configured for Endpoint A, registered to Cisco Unified Communications Manager, to dial Endpoint B, registered to Cisco VCS?
What needs to be configured for Endpoint A, registered to Cisco Unified Communications Manager, to dial Endpoint B, registered to Cisco VCS?
A. An IPsec VPN tunnel needs to be configured.
B. A SIP trunk needs to be configured.
C. A Cisco VCS directory needs to be configured.
D. A dedicated UCM subscriber needs to be configured for the Cisco VCS.

Correct Answer: B
Explanation/Reference:
Explanation:

**Question 80**
Which statement is correct about the configuration of the call control device?
Which statement is correct about the configuration of the call control device?
A. The Cisco TelePresence Management Suite can auto-provision the dial plan between the Cisco VCS and Cisco Unified Communications Manager, using CDP.
B. The Cisco Unified Communications Manager dial plan only supports numeric values.
C. The Cisco VCS and Cisco Unified Communications Manager can pass dial plan information between them to create a single directory based on an H.350 schema.
D. The Cisco VCS and Cisco Unified Communications Manager support numeric and URI dialing.

Correct Answer: D
Explanation/Reference: real answer.

**Question 81**
Which statement is true about the registration restriction policy within the Cisco TelePresence VCS?
Which statement is true about the registration restriction policy within the Cisco TelePresence VCS?
A. Allow lists allow all registrations except those listed, Deny lists deny all registrations except those listed.
B. Allow lists allow all registrations except those listed, Deny lists allow all registrations except those listed.
C. Allow lists deny all registrations except those listed, Deny lists allow all registrations except those listed.
D. Allow lists deny all registrations except those listed, Deny lists deny all registrations except those listed.
Correct Answer: C
Explanation/Reference:
well Explained answer.

**Question 82**
How many peer relationships are required to implement a hierarchical dial plan for a network of 6 regional VCS controls?
How many peer relationships are required to implement a hierarchical dial plan for a network of 6 regional VCS controls?
A. 1
B. 2
C. 6
D. 15

Correct Answer: C
Explanation/Reference:
exact answer.

**Question 83**
Which order will pre-search operations occur on a Cisco TelePresence VCS?
In which order will pre-search operations occur on a Cisco TelePresence VCS?
A. Transforms, Call Policy, User Policy
B. Call Policy, User Policy, Transforms
C. User Policy, Call Policy, Transforms
D. Transforms, User Policy, Call Policy

Correct Answer: A
Explanation/Reference:
Explanation:

**Question 84**
What will happen if you make configuration changes to a VCS peer in a cluster that is not the master?
What will happen if you make configuration changes to a VCS peer in a cluster that is not the master?
A. The peer will not allow the changes to be saved.
B. The changes will propagate to other peers, including the master.
C. The master will overwrite the changes.
D. The peer will hold the changes but not synchronize the changes to the master.

Correct Answer: C
Explanation/Reference:
real answer.

**Question 85**
What does it mean when an endpoint is Multiway-enabled?
What does it mean when an endpoint is Multiway-enabled?
A. Endpoints can transfer calls from one endpoint to another.
B. Endpoints can make simultaneous SIP and H.323 calls.
C. Endpoints can deliver three or more streams of video.
D. Endpoints can escalate calls to an MCU.

Correct Answer: D
Explanation/Reference:
*answer is absolute.*

**Question 86**
What type of DNS record is required for URI dialing?
A. MX record
B. SIP record
C. SRV record
D. HTTP record

Correct Answer: C
Explanation/Reference:
*answer is absolute.*

**Question 87**
Which regular expression matches 50440123 and 4044123, but not 60440123?
A. [6].*
B. [45].*
C. {6}.*
D. {45}.*

Correct Answer: B
Explanation/Reference:
Explanation:

**Question 88**
Which user groups on the Cisco TelePresence VCS are available for LDAP integration?
A. administration and FindMeTM users
B. administration and supervisor users
C. supervisor users and client users
D. client users and FindMe users

Correct Answer: A
Explanation/Reference:
Explanation:

**Question 89**
Which feature must be enabled on the Cisco TelePresence VCS in order to monitor the status of non-presence-enabled clients?
A. Presence User Agent
B. interworking
C. FindMe?
D. LDAP

Correct Answer: A
Explanation/Reference: reliable answer.

**Question 90**
What do you need to do in order to prevent browsers from generating warnings about certificates when they access the Cisco TelePresence VCS?
A. Install a certificate from a trusted certificate authority.
B. Install a certificate from the TAC.
C. Disable certificates on the Cisco TelePresence VCS.
D. Disable the CPL scripts from running to check security.

Correct Answer: A
Explanation/Reference: Explanation:

**Question 91**
What information about a change can you determine from the configuration log on a Cisco TelePresence VCS?
A. the E.164 alias of the person who made the change
B. the IP SIP address of the person who made the change
C. the H.323 ID of the person who made the change
D. the username of the person who made the change

Correct Answer: D
Explanation/Reference: Explanation:

**Question 92**
Which troubleshooting tools are available on the Cisco TelePresence VCS (X5 or above)?
A. configuration logs for all endpoints registered, endpoint status logs, and Cisco TelePresence MCU conference reports
B. system resources, call history, search history, zone and subzone status, warnings, event logs
C. H.323, SIP, and ISDN syslogs for each endpoint registered, all logs for all calls on the network
D. searches, locate tools, check rules, syslog, call history, current calls, call logs from the endpoints

Correct Answer: B
Explanation/Reference: straight answer.
