500-007 75 Questions Implementing Cisco TelePresence Video Solution, Part 1

Exam Code: 500-007
Certification: Cisco Specialist
Posted: 2017-06-05
http://www.aoowe.com

Question 1
Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?
Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?
A. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway regardless of whether one of the endpoints is locally registered.
B. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway only if one of the endpoints is locally registered.
C. The Cisco TelePresence VCS will not act as a SIP-to-H.323 gateway.
D. The Cisco TelePresence VCS will permit all traffic from any H.323 or SIP endpoint that is registered locally.

Correct Answer: A
Explanation/Reference: answer is to the point.

Question 2
Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?
Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?
A. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway regardless of whether one of the endpoints is locally registered.
B. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway only if one of the endpoints is locally registered.
C. The Cisco TelePresence VCS will not act as a SIP-to-H.323 gateway.
D. The Cisco TelePresence VCS will permit all traffic from any H.323 or SIP endpoint that is registered locally.

Correct Answer: A
Explanation/Reference: answer is to the point.

Question 3
The Cisco TCS provides which two functions?
The Cisco TCS provides which two functions? (Choose two.)
A. records any standards-based video conferencing session
B. records video from IP-based encoders
C. can stream out live TelePresence sessions over IP networks
D. allows users to upload videos for conversion into H.264 or MP4

Correct Answer: AC
Explanation/Reference:
Explanation:

**Question 4**
What restriction will be applied?
If you do not have a valid release key, what restriction will be applied?
A. The Cisco TelePresence Management Suite will only manage three systems.
B. Installation will fail and the Cisco TelePresence Management Suite will not be installed.
C. The Cisco TelePresence Management Suite will only operate for 30 days.
D. The SQL database will be purged every 30 days.

Correct Answer: A
Explanation/Reference:

**Question 5**
What does the Cisco TelePresence MCU service prefix do?
A. ensures that all H323 calls beginning with the prefix are routed to the Cisco TelePresence MCU
B. is added to all aliases before registration
C. diverts calls to the default auto attendant
D. identifies which services the Cisco TelePresence MCU will offer in each configured meeting room

Correct Answer: A
Explanation/Reference: answer is justified.

**Question 6**
Which two settings can be configured using the serial connection when you are running the Cisco TelePresence VCS install wizard?
A. device name
B. device ID number
C. IP address
D. password
E. default video codec

Correct Answer: CD
Explanation/Reference: absolutely perfect answer.
Question 7
Which two statements are true?
If the user purchases the Cisco TelePresence Touch panel, which two statements are true? (Choose two.)
A. Both the TRC5 remote control and the Touch panel can be used simultaneously.
B. Either the TRC5 remote control or the Touch panel can be used, but not both simultaneously.
C. The Touch panel should be used to make calls, but the TRC5 remote control should be used to configure the unit.
D. The web interface can be used to configure the unit.

Correct Answer: BD
Explanation/Reference:
proper answer.

Question 8
What can you see on the Status > Registrations > By Device page?
A. currently registered SIP and H.323 devices
B. all devices that were registered for SIP or H.323 since the last reboot
C. currently registered H.323 devices only
D. currently registered SIP devices only

Correct Answer: A
Explanation/Reference:
Explanation:

Question 9
Which three are true statements regarding the Cisco TelePresence endpoint product set?
A. The MX200 and MX300 are all-inclusive systems and do not require additional AV components.
B. The MX200 and MX300 are integrator codec systems and require additional AV components.
C. The EX60 and EX90 are room-based TelePresence systems intended for use in board rooms.
D. The C90 is a high end integrator codec.
E. The EX90 is an integrator codec.
F. The C40 is a basic integrator codec supporting dual monitors.

Correct Answer: ADF
Explanation/Reference:
Explanation:

Question 10
Which two statements about the Cisco TCS are correct?
A. It contains an internal gatekeeper.
B. It allows creators to edit videos.
C. It runs on the Windows operating system.
D. It runs on the Linux operating system.
Correct Answer: BC
Explanation/Reference:
answer is modified.

**Question 11**
Which menu allows you to do this?
You want to reconfigure the H.323 and SIP settings using the remote control on the Cisco TelePresence Codec C90. Which menu allows you to do this?
A. Audio input levels
B. IP settings
C. Advanced configuration
D. Protocol configuration

Correct Answer: C
Explanation/Reference:
proper answer.

**Question 12**
Which two video formats?
Cisco TCS recordings can be encoded into which two video formats? (Choose two.)
A. MPEG-4 for Flash and QuickTime
B. WMV
C. H.262
D. Sorensen VP8 for Flash

Correct Answer: AB
Explanation/Reference:
answer is absolutely right.

**Question 13**
Which two of these can be found by navigating to TCS Diagnostic > Server Overview in the Cisco TCS web interface?
Which two of these can be found by navigating to TCS Diagnostic > Server Overview in the Cisco TCS web interface? (Choose two.)
A. option key information
B. recording port activity status
C. Cisco VCS registration status
D. which Cisco TMS is managing the TCS

Correct Answer: AB
Explanation/Reference:
perfect answer.

**Question 14**
Which two pieces of troubleshooting information does the Cisco TCS provide?
Which two pieces of troubleshooting information does the Cisco TCS provide? (Choose two.)
A. log messages that can be accessed by the site manager through the CLI
B. recording alias processing progress
C. error logs that only Cisco TAC can access
D. log messages that can be accessed by the site manager through the web interface

Correct Answer: BD
Explanation/Reference:
answer is great.

**Question 15**
Which two locations can Cisco TCS recordings be viewed?
In which two locations can Cisco TCS recordings be viewed? (Choose two.)
A. directly on the Cisco TCS web portal
B. in the Cisco TelePresence Management Server
C. on a video endpoint
D. on the Codec C90 touch panel

Correct Answer: AC
Explanation/Reference:
elaborated answer.

**Question 16**
Which statement about playing back Cisco TCS recordings is true?
Which statement about playing back Cisco TCS recordings is true?
A. It is not possible to play back Cisco TCS recordings from a video endpoint.
B. The Cisco TCS must register to the Cisco VCS as an H.323 gateway in order to play back recordings on video endpoints.
C. The Cisco TCS will automatically assign an E.164 playback number to recordings if it is registered as an H.323 terminal.
D. The Cisco TCS must register to the Cisco VCS using SIP in order to play back on any video endpoint.

Correct Answer: B
Explanation/Reference:
Explanation:

**Question 17**
Which two statements about Cisco TCS recording templates are true?
Which two statements about Cisco TCS recording templates are true? (Choose two.)
A. Every recording alias contains one recording template.
B. They provide a way to produce recordings without a recording alias.
C. They must always contain a media server configuration.
D. There can only be one system recording template.

Correct Answer: AC
Explanation/Reference:
Explanation:

**Question 18**
Which two statements about Cisco TCS users are true?
Which two statements about Cisco TCS users are true? (Choose two.)
A. Users with the creator role can create their own recording aliases.
B. Local users have only limited Cisco TCS permissions.
C. Users can be assigned to the Cisco TCS through an Active Directory LDAP server.
D. User permissions are based on one of three assignable roles.

Correct Answer: CD
Explanation/Reference:
answer is genuine.

Question 19
Which of these constitutes a Cisco TCS recording alias?
A. a recording template, a media server configuration, and a call configuration
B. a media server configuration and a call configuration
C. a recording template and a media server configuration
D. a recording template and a call configuration

Correct Answer: A
Explanation/Reference:
valid answer.

Question 20
Which two statements about Cisco TCS recording aliases are true?
A. System recording aliases can only be dialed by the site manager (administrator).
B. Any recording alias can be triggered by dialing its assigned URI or E.164 number.
C. Recordings resulting from a personal recording alias can only be managed by their creator.
D. Final recordings made from a recording alias cannot be modified.

Correct Answer: BC
Explanation/Reference:
reliable answer.

Question 21
What is the effect of registering the Cisco TCS with the Cisco VCS using H.323 gateway mode?
A. The Cisco TCS does not support this type of registration.
B. An unlimited number of recording aliases can be assigned.
C. The Cisco TCS is prevented from making an outbound call to a Cisco MCU.
D. The Cisco TCS can traverse calls between SIP and H.323.

Correct Answer: B
Explanation/Reference:
Explanation:

Question 22
What are two ways to set the IP network information on the Cisco TCS?
A. DHCP

B. statically set on its Windows operating system
C. statically set on its Linux operating system
D. automatically assigned by the Cisco TelePresence Management Server

Correct Answer: AB
Explanation/Reference: answer is authentic.

Question 23
Which two statements about the Cisco TCS are correct?
Which two statements about the Cisco TCS are correct? (Choose two.)
A. It contains an internal gatekeeper.
B. It allows creators to edit videos.
C. It runs on the Windows operating system.
D. It runs on the Linux operating system.

Correct Answer: BC
Explanation/Reference: answer is modified.

Question 24
The Cisco TCS provides which two functions?
The Cisco TCS provides which two functions? (Choose two.)
A. records any standards-based video conferencing session
B. records video from IP-based encoders
C. can stream out live TelePresence sessions over IP networks
D. allows users to upload videos for conversion into H.264 or MP4

Correct Answer: AC
Explanation/Reference: Explanation:

Question 25
Which method should you use to populate it with entries?
After you create a phone book in the Cisco TelePresence Management Suite, which method should you use to populate it with entries?
A. Connect the phone book to a phone book source.
B. Manually type entries into the phone book.
C. Connect the phone book to a gatekeeper.
D. Upload a file in .mdf format.

Correct Answer: A
Explanation/Reference: suitable answer.

Question 26
Where can you do this?
You want to obtain specific configuration details from each of the systems that are registered to your Cisco TelePresence Management Suite. Where can you do this?
A. Choose Navigator from the Systems menu.
B. Choose System Overview from the Systems menu.
C. Run System Tracking from the Systems menu.
D. Connect to the Cisco TelePresence Management Suite via a console connection and use show commands.

Correct Answer: B
Explanation/Reference: 
superb answer.

Question 27
Which three ways can systems be added in the Cisco TelePresence Management Suite? By which three ways can systems be added in the Cisco TelePresence Management Suite? (Choose three.)
A. by preregistering systems
B. from a .csv file
C. by importing from a Cisco TelePresence VCS
D. by user-configured name
E. by dialing an endpoint
F. by IP address
G. from a list of previously discovered systems

Correct Answer: AFG
Explanation/Reference:
Explanation:

Question 28
When a new conference is booked on the Cisco TelePresence Management Suite, which setting instructs the endpoint or Cisco TelePresence MCU to call a participant at the time of a conference? When a new conference is booked on the Cisco TelePresence Management Suite, which setting instructs the endpoint or Cisco TelePresence MCU to call a participant at the time of a conference? A. Manual
B. Call-in Only
C. Reverse Call
D. Automatic

Correct Answer: D
Explanation/Reference:
Explanation:

Question 29
Where would you enter release and option keys into the Cisco TelePresence Management Suite? Where would you enter release and option keys into the Cisco TelePresence Management Suite? A. in Configuration > General Settings
B. on the portal page
C. through the release key generator in a terminal session on the server
D. on the Cisco TelePresence Manager Suite server maintenance page
Question 30
What restriction will be applied?
If you do not have a valid release key, what restriction will be applied?
A. The Cisco TelePresence Management Suite will only manage three systems.
B. Installation will fail and the Cisco TelePresence Management Suite will not be installed.
C. The Cisco TelePresence Management Suite will only operate for 30 days.
D. The SQL database will be purged every 30 days.

Correct Answer: A
Explanation/Reference:

Question 31
Which installation option should you choose if you wish to use an external SQL database?

A. Complete
B. Custom
C. Advanced
D. Basic

Correct Answer: B
Explanation/Reference:

Question 32
What should you do with your SQL database?
Before you upgrade your Cisco TelePresence Management Suite, what should you do with your SQL database?
A. Save a backup.
B. Restore a previous version.
C. Set a new username and password.
D. Create a second copy.

Correct Answer: A
Explanation/Reference:

Question 33
What are two ways that a conference participant can be disconnected from a conference?
What are two ways that a conference participant can be disconnected from a conference? (Choose two.)
A. by using the MCU 5300 web interface
B. will be automatically disconnected at the end of the allotted time
C. by the auto attendant
D. will be disconnected when the conference exceeds its maximum capacity
Correct Answer: AB
Explanation/Reference:

**Question 34**
What is one way that a conference participant’s screen layout be changed without affecting other participants?

A. via the participant settings in the MCU 5300 web interface
B. via the conference settings in the MCU 5300 web interface
C. by the nominated chair endpoint using FECC
D. by moving the participant into a different meeting using the MCU 5300 web interface

Correct Answer: A
Explanation/Reference:

**Question 35**
How do you obtain a SIP log from the Cisco TelePresence MCU 5300 to send to Cisco TAC for further analysis?

A. Navigate to Maintenance > Logs, and then download the log.
B. Navigate to Logs > Event Log > SIP Details, and then download the log.
C. Navigate to Logs > H.323/SIP Log, click Enable H323/SIP Logging, and then download the log.
D. Use FTP to access the MCU, go to the directory /etc/logs/sip, and get all the files in that directory.

Correct Answer: C
Explanation/Reference:

**Question 36**
How do you upgrade the software of an existing installation with a Cisco TelePresence MCU 5300?

A. Download the new software, navigate to Maintenance > Upgrade Software, and upload the software.
B. Use FTP to access the MCU, browse to the /etc/software/upgrade directory, put the new load in, and reboot the MCU.
C. Navigate to Settings > Upgrade, then follow instructions under Main Software Image.
D. Use an SFTP client to log in to the MCU, and place the software in the /etc/software/upgrade directory.

Correct Answer: C
Explanation/Reference:
Question 37
How should you configure the IP address and default gateway on a Cisco TelePresence MCU 5300 Series device during setup?

A. Connect an Ethernet cable to the second Ethernet port of the MCU, and point your web browser to 192.168.2.2.
B. Console into the serial port in the front panel, and use the static command.
C. Use the arrows next to the LCD in the front to change the IP address, subnet mask, and default gateway.
D. Change it from the Cisco VCS.

Correct Answer: B
Explanation/Reference: 
Explanation:

Question 38
How many endpoints can register to the built-in H.323 gatekeeper of a Cisco TelePresence MCU 5300 Series device?

A. none; there is no built-in gatekeeper
B. 25
C. 100
D. 300

Correct Answer: A
Explanation/Reference: 
rectified answer.

Question 39
Where can you verify the licensing on a Cisco TelePresence MCU 5300?

A. Settings > Upgrade
B. Settings > Conferences
C. Settings > Content
D. Status > Help

Correct Answer: A
Explanation/Reference: 
appropriate answer.

Question 40
How many rack units does a Cisco TelePresence MCU 5300 occupy in a standard data center rack?

A. 1
B. 2
Question 41
What is the maximum port capacity of the 5320 MCU?
A. 5 HD+ or 10 HD or 20 SD or 24 nHD
B. 1 HD+ or 2 HD or 4 SD or 8 nHD
C. 10 HD+ or 20 HD or 40 SD or 48 nHD
D. 20 HD+ or 40 HD or 80 SD or 96 nHD
Correct Answer: C
Explanation/Reference:
true answer.

Question 42
What effect does the ‘Prefix for MCU Registrations’ have on Cisco TelePresence MCU registration?
A. The prefix replaces the domain if the prefix is dialed.
B. The prefix is placed in front of all SIP URIs.
C. Anything that is dialed with the prefix will be routed to the Cisco TelePresence MCU.
D. The prefix is placed in front of all E.164 aliases.
Correct Answer: D
Explanation/Reference:
obvious answer.

Question 43
Which two ways can an endpoint join a conference on the Cisco TelePresence MCU?
A. dialing a registered alias for the conference
B. dialing the auto attendant and navigating to the conference
C. dialing an endpoint that is already in the conference
D. dialing all endpoints that are required in the conference
E. dialing the PIN number of the conference
Correct Answer: AB
Explanation/Reference:
Explanation:

Question 44
How does an administrator move an endpoint efficiently from one conference to another on a
Cisco TelePresence MCU?
How does an administrator move an endpoint efficiently from one conference to another on a Cisco TelePresence MCU?
A. From the Move Participants screen, right-click the participant and select the new conference from the drop-down list.
B. From the Move Participants screen, drag and drop a participant from one conference to another.
C. From the Conference menu, select the participant, and then select the new conference.
D. From the web interface, disconnect the participant, and then reconnect manually to the new conference.

Correct Answer: B
Explanation/Reference:
real answer.

Question 45
What does the Cisco TelePresence MCU service prefix do?
A. ensures that all H323 calls beginning with the prefix are routed to the Cisco TelePresence MCU
B. is added to all aliases before registration
C. diverts calls to the default auto attendant
D. identifies which services the Cisco TelePresence MCU will offer in each configured meeting room

Correct Answer: A
Explanation/Reference:
answer is justified.

Question 46
How can you register a prefix to route all SIP calls beginning with that prefix to the Cisco TelePresence MCU?
A. You cannot; all SIP addresses must be registered individually.
B. The H.323 prefix is automatically used.
C. You cannot; you need to use a suffix in the form of a domain.
D. The username is used as the suffix.

Correct Answer: A
Explanation/Reference:
Explanation:

Question 47
Which two of these will be registered on the Cisco TelePresence VCS, assuming that SIP and H.323 registration have been selected?
If an auto attendant has a numeric ID of 543 and the Cisco TelePresence MCU has a prefix of 62 and a domain of cisco.demo, which two of these will be registered on the Cisco TelePresence VCS, assuming that SIP and H.323 registration have been selected? (Choose two.)
A. 62543
B. [email protected]
C. 543  
D. [email protected]  
E. [email protected]  

Correct Answer: AB  
Explanation/Reference:

**Question 48**
What does an endpoint system use to navigate the Auto Attendant menu on the Cisco TelePresence MCU?
A. FECC or DTMF navigation  
B. a special remote that came with the Cisco TelePresence MCU  
C. only FECC; DTMF is not supported  
D. web interface of the endpoint  

Correct Answer: A  
Explanation/Reference:  
*applicable answer.*

**Question 49**
What else is needed before connections can be established in both directions?
If the zones in a VCS firewall traversal solution are established, what else is needed before connections can be established in both directions?
A. A call policy must be established  
B. VCS search rules must be created for each zone.  
C. The VCS control and the VCS expressway must be neighbored.  
D. Transforms must be created in the VCS traversal server zone.  

Correct Answer: B  
Explanation/Reference:  
*answer is right.*

**Question 50**
Which command is used to set the IP configuration for a Cisco TelePresence MCU 5300?
A. status IP address netmask default GW  
B. xconfigure IP address netmask default GW  
C. static A IP address netmask default GW  
D. set IP address netmask default GW DNS server address  

Correct Answer: C  
Explanation/Reference:  
*Best answer.*

**Question 51**
How are firewall traversal connections established between the Cisco TelePresence VCS Expressway and Control?
How are firewall traversal connections established between the Cisco TelePresence VCS Expressway and Control?
A. The traversal client establishes connections outbound to the traversal server.
B. The traversal server establishes connections inbound to the traversal client.
C. Connections are established in both directions from the traversal server to the traversal client.
D. The traversal server negotiates acceptable connection ports with the firewall.

Correct Answer: A
Explanation/Reference:
answer is clear.

Question 52
Which two of these are required for restoring a backup to another Cisco VCS?
Which two of these are required for restoring a backup to another Cisco VCS? (Choose two.)
A. the same version of software of as the original Cisco VCS
B. the same basic IP address settings
C. an empty configuration on the Cisco VCS
D. the same option keys

Correct Answer: AD
Explanation/Reference:
Explanation:

Question 53
Which of these must be enabled to set up a Cisco TelePresence soft client (such as Cisco Jabber or Movi) on a Cisco TelePresence VCS Expressway Starter Pack?
Which of these must be enabled to set up a Cisco TelePresence soft client (such as Cisco Jabber or Movi) on a Cisco TelePresence VCS Expressway Starter Pack?
A. SIP
B. H.323
C. interworking
D. Multiway

Correct Answer: A
Explanation/Reference:

Question 54
Which type of account needs to be set up to create a Cisco TelePresence soft client (such as Cisco Jabber or Movi) user if you are using the Cisco TelePresence VCS Expressway Starter Pack?
Which type of account needs to be set up to create a Cisco TelePresence soft client (such as Cisco Jabber or Movi) user if you are using the Cisco TelePresence VCS Expressway Starter Pack?
A. a local FindMe account on the Cisco VCS
B. a local admin account on the Cisco VCS
C. an LDAP user account on Active Directory
D. an LDAP FindMe account on Active Directory

Correct Answer: A
Explanation/Reference:
Explanation:
**Question 55**
Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?

Which statement is true when H.323 and SIP interworking is set to on in the Cisco TelePresence VCS?
A. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway regardless of whether one of the endpoints is locally registered.
B. The Cisco TelePresence VCS will act as a SIP-to-H.323 gateway only if one of the endpoints is locally registered.
C. The Cisco TelePresence VCS will not act as a SIP-to-H.323 gateway.
D. The Cisco TelePresence VCS will permit all traffic from any H.323 or SIP endpoint that is registered locally.

Correct Answer: A
Explanation/Reference: 
answer is to the point.

**Question 56**
Which two interworking functions are supported on the Cisco VCS?

Which two interworking functions are supported on the Cisco VCS? (Choose two.)
A. SIP-to-H.323
B. IPv4-to-IPv6
C. H.323-to-H.320
D. firewall traversal

Correct Answer: AB
Explanation/Reference: 
Explanation:

**Question 57**
Which two items need to match in the Cisco TelePresence VCS configuration and the endpoint configuration?

In the SIP configuration, which two items need to match in the Cisco TelePresence VCS configuration and the endpoint configuration? (Choose two.)
A. service prefix
B. Cisco VCS IP address
C. DNS server
D. SIP domain

Correct Answer: BD
Explanation/Reference: 
Explanation:

**Question 58**
Which two features that are not found in a Cisco VCS Control? 

The Cisco VCS Starter Pack Express supports which two features that are not found in a Cisco VCS Control? (Choose two.)
A. Jabber for iPad support
B. Expressway server
C. local device authentication
D. built-in provisioning

Correct Answer: BD
Explanation/Reference:
Explanation:

Question 59
Which of these options shows the methods that are available to configure a Cisco VCS appliance at initial installation?
Which of these options shows the methods that are available to configure a Cisco VCS appliance at initial installation?
A. CLI over serial port, web interface, keyboard and monitor
B. CLI over serial port, web interface, LCD panel
C. CLI over serial port, web interface, boot disk
D. using the Cisco Prime Collaboration Manager, after running ‘system discovery’ to discover the newly added Cisco VCS

Correct Answer: B
Explanation/Reference: answer is reliable.

Question 60
Which feature or features will work on a new Cisco TelePresence VCS as soon as the IP configuration is done?
Which feature or features will work on a new Cisco TelePresence VCS as soon as the IP configuration is done?
A. H.323
B. H.323 and SIP
C. H.323, SIP, and Interworking
D. H.323, SIP, Interworking, and Firewall Traversal

Correct Answer: A
Explanation/Reference:
Explanation:

Question 61
Which two settings can be configured using the serial connection when you are running the Cisco TelePresence VCS install wizard?
Which two settings can be configured using the serial connection when you are running the Cisco TelePresence VCS install wizard? (Choose two.)
A. device name
B. device ID number
C. IP address
D. password
E. default video codec

Correct Answer: CD
Explanation/Reference: absolutely perfect answer.
Question 62
What can you see on the Status > Registrations > By Device page?
A. currently registered SIP and H.323 devices
B. all devices that were registered for SIP or H.323 since the last reboot
C. currently registered H.323 devices only
D. currently registered SIP devices only

Correct Answer: A
Explanation/Reference:
Explanation:

Question 63
When using the Cisco TelePresence Touch panel with a Codec C90, which Administrator settings can you access?
A. all of the same Administrator settings as when using the TRC5 remote
B. a limited subset of the Administrator settings compared with using the TRC5 remote
C. none of the Administrator settings
D. only the Custom Video Layout settings

Correct Answer: B
Explanation/Reference:

Question 64
What is the maximum resolution that you can transmit and receive?
If you do not have the Premium Resolution option installed on a Cisco TelePresence endpoint, what is the maximum resolution that you can transmit and receive?
A. 1080p30
B. 720p60
C. 720p30
D. Standard definition resolutions only

Correct Answer: C
Explanation/Reference: most sophisticated answer.

Question 65
Which two statements are true?
If the user purchases the Cisco TelePresence Touch panel, which two statements are true? (Choose two.)
A. Both the TRC5 remote control and the Touch panel can be used simultaneously.
B. Either the TRC5 remote control or the Touch panel can be used, but not both simultaneously.
C. The Touch panel should be used to make calls, but the TRC5 remote control should be used to configure the unit.
D. The web interface can be used to configure the unit.
Question 66
When configuring a Cisco TelePresence EX, MX, or C Series device, which two statements are true?
A. The unit can be completely configured from the web interface.
B. If available, the TRC5 remote control can be used to completely configure the unit.
C. The API must be used in order to configure the unit.
D. The Touch panel can be used to completely configure the unit.

Correct Answer: AB
Explanation/Reference:
Explanation:

Question 67
Which statement is true regarding passwords on a Cisco TelePresence MX, EX, C Series, or SX20 device?
A. The device ships from factory with the admin account enabled, with no password.
B. The device ships from factory with the admin account enabled, with a default password of CISCO.
C. The device ships from factory with the admin account enabled, with a default password of TANDBERG.
D. The device ships from factory with the root account enabled, with no password.

Correct Answer: A
Explanation/Reference:
acceptable answer.

Question 68
What are the two methods for pairing an 8-inch Cisco TelePresence Touch panel to a Codec C90?
A. Plug the cable that is attached to the Touch panel directly into the back of the Codec C90.
B. Plug the provided Ethernet cable from the Touch panel power supply into the second Ethernet port on the Codec C90.
C. Plug the provided Ethernet cable from the Touch panel power supply into the LAN and pair over the network.
D. Use the built-in wireless on the Touch panel to pair over the network.

Correct Answer: BC
Explanation/Reference:
Explanation:
Question 69
Which three are true statements regarding the Cisco TelePresence endpoint product set? (Choose three.)
A. The MX200 and MX300 are all-inclusive systems and do not require additional AV components.
B. The MX200 and MX300 are integrator codec systems and require additional AV components.
C. The EX60 and EX90 are room-based TelePresence systems intended for use in board rooms.
D. The C90 is a high end integrator codec.
E. The EX90 is an integrator codec.
F. The C40 is a basic integrator codec supporting dual monitors.

Correct Answer: ADF
Explanation/Reference:
Explanation:

Question 70
