Question 1

Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud.

Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Define a fulfillment line status rule set for each category.
- B. Create a unique step for each category and assign different “next expected task statuses.”
- C. Define orchestration process status values for each category.
- D. Assign the status catalog to the orchestration process.

Correct Answer: CD Section: (none)Explanation

Explanation/Reference:

Explanation An orchestration process is a predefined business process that coordinates the orchestration of physical goods and activities within a single order and automates order orchestration across fulfillment systems.

Reference https://docs.oracle.com/cloud/18/scmcs_gs/FAOFO/F1191897AN12E0B.htm

Question 2

Which two statements are true about the functional capabilities of Oracle Cloud Configurator? (Choose two.)

- A. For users who do not have access to Oracle Fusion Product Hub, Oracle provides an alternative option to create models directly in the workspace area.
- B. Only the optional structure and attributes of a Product Item are imported from Product Hub to Configurator and not the mandatory elements because they cannot be configured by an end user.
- C. Multiple drafts of the same model can be modified at the same time, but they must be in different workspaces.
- D. The user interface pages are tightly connected to the model. You cannot add, delete, or reorder pages without affecting the model structure.

Correct Answer: BC Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cloud/latest/scmcs_gs/FACMG/FACMG1801677.htm#FACMG1831297
(model structure, model versions)

Question 3

Which three mandatory setups must be performed so that a purchase request is created for sales orders that will be fulfilled by a drop ship supplier? (Choose three.)

- A. Specify the preparer name in the Order Management parameters.
- B. Select the Customer Sales Order Fulfillment check box under the Procurement offering.
- C. Create a business rule in Supply Chain Orchestration.
- D. Define a sourcing rule of type Buy with a supplier and supplier site.
- E. Select the check box “Use Customer sales order” in the Group Requisitions section in the blanket

purchase agreement.
Correct Answer: ABC

Question 4

A tax authority requires that you calculate tax only on the selling price of an item that you are selling, and not on the shipping charge.

How will you achieve this?

- A. by moving the “Compute Tax” step before the “Create Net Price Charge Component” step in the Pricing algorithm
- B. by moving the “Compute Tax” step before the “Create Shipping Charges” step in the Pricing algorithm
- C. by creating a sub- algorithm and an expression builder
- D. by using nested action and Groovy scripts

Correct Answer: B

Question 5

A furniture retailer wants its online buyers to first choose their underlying need, which will then direct them to the related list of accessories and product parts of the configurable furniture product. The retailer intends to do this by presenting standard questions to the online buyers on their needs, and then presenting the related list of accessories and parts through dynamic user interfaces.

What step is required to enable this feature?

- A. Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.
- B. Add a supplemental structure to the option classes of the item-based model in the workspace area of the Configurator.
- C. Add a supplemental structure to the root node of the item-based model in Fusion Product Hub, and then import it into the Configurator.
- D. Add a supplemental structure at the option class level for each model product in Fusion Product Hub, and then import it into the Configurator.

Correct Answer: B Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cloud/latest/scmcs_gs/FACMG/FACMG1801676.htm#FACMG1801676

Question 6

Which three attributes in the orchestration process definition utilize Oracle business rules to make runtime decisions for process behavior? (Choose three.)

- A. Cost of Change
- B. Exit Criteria
- C. Line Selection Criteria
- D. Start After conditions
- E. Evaluation Sequence

Correct Answer: ABC

Question 7

A global Power Systems manufacturer sells Uninterrupted Power Supply (UPS) products through its online portal. To gain competitive advantage, the manufacturer wants to enhance the ability of buyers to select a desired configuration of the high-end UPS models through guided selling options on its online selling portal. The company's product development team has finalized the enhancements, and needs your help to get them implemented on their online selling portal that is supported by Oracle Cloud Configurator.

What four actions would you take in Oracle Cloud Configurator to enhance a buyer's experience? (Choose four.)

- A. You can allow buyers to raise requests if an expected product functionality is not offered.
- B. You can create enhancements to the model structure that supplements the imported configurable structure of a model item.
- C. You can create rules that will guide users in creating a valid model.
- D. You can create user interfaces that will be dynamically presented to users based on the options chosen in the Configurator model.
- E. You can test the behavior of the configured model anytime when you are editing it.
- F. You can enable a checkout option for a model when a valid configuration is finalized.

G. You can display product reviews of customers who have purchased the same configuration earlier.
Correct Answer: BDFG

Question 8

Identify two valid use cases where a process assignment rule is defined to assign an orchestration process.
(Choose two.)

- A. when you require multiple orchestration processes for one fulfillment line
- B. when you require one orchestration process for one fulfillment line
- C. when you require one orchestration process for sales order lines
- D. when you require one orchestration process for multiple fulfillment lines

Correct Answer: AD

Question 9

Your customer wants to prohibit updates to the “Subcontractor License No” field in a fulfillment line after a fulfillment line is closed. The “Subcontractor License No” field is a context-based extensible flexfield in the fulfillment line.

Identify the correct sequence of steps for setting up the preceding constraint.

- A. Create a constraint entity > Enable the extensible flexfield > Create a validation rule set > Create a record set > Create a processing constraint.
- B. Enable the extensible flexfield > Create a validation rule set > Create a record set > Create the processing constraint.
- C. Enable the extensible flexfield > Create a record set > Create a validation rule set > Create the processing constraint.
- D. Enable the extensible flexfield > Create a validation rule set > Create the processing constraint.
- E. Create a constraint entity > Enable the extensible flexfield > Create a record set > Create a validation rule set > Create a processing constraint.

Correct Answer: C

Question 10

Which statement is true about the definition of source systems in Functional Setup manager?

- A. All order capture and fulfillment systems are defined as Spoke systems.
- B. The Oracle Fusion order capture and fulfillment system is defined as Fusion.
- C. All external order capture systems are defined as Spoke systems and the Fusion fulfillment system is defined as Fusion.
- D. All external order capture systems are defined as Spoke systems and external fulfillment systems are defined as purchased.

Correct Answer: B Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cloud/farel8/scmcs_gs/FAOFO/F1191897AN12E0B.htm

Question 11

Which step must be performed before enabling a new inventory organization in SCM cloud for collection from Manage Upstream and Downstream Source System Task?

- A. Add the Organization against the OPS destination system.
- B. Add the Organization against the OPS source system manually.
- C. Refresh the Organization List against the Oracle Planning and Sourcing (OPS) source system.
- D. Create a new source system for each organization.

Correct Answer: D

Question 12

Which two activities can you perform by using Global Order Promising's stand-alone work area? (Choose two.)

- A. You can split quantities against a Sales Order Line to perform what-if simulations and evaluate better ways of promising an order.
- B. You can re-schedule order lines that are already scheduled.
- C. You can initiate back-to-back orders to expedite fulfillment of lines with a delayed schedule ship date.
- D. You can simulate the Capable-to-Promise option in place of the Available-to-Promise option for quicker fulfillment.

Correct Answer: AB

Question 13

You are implementing Oracle Cloud Pricing for a Fortune 500 hi-tech components distributor who operates on wafer thin margins.

Identify a pricing rule associated with a pricing strategy that can be used for evaluating the margin.

- A. Currency conversion lists
- B. Cost Lists
- C. Discount Lists
- D. Price Lists
- E. Shipping charge lists

Correct Answer: B Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cloud/latest/scmcs_gs/FAUPR/FAUPR1969475.htm#FAUPR1120614

Question 14

Identify three ongoing maintenance tasks that a user is required to execute from the Order Management Work Area after the Order Management Implementation is completed. (Choose three.)

- A. Manage Fulfillment Line Exceptions
- B. Manage Order in Errors
- C. Manage Order Orchestration Messages
- D. Manage Source Systems
- E. Manage Orchestration Statuses

Correct Answer: ACE

Question 15

The warehouse manager of your company wants manual intervention to handle the allocated materials and to backorder the sales order lines in case of any physical discrepancies in the stock before pick confirmation. The warehouse manager wants to enforce manual picking followed by auto ship confirmation based on the picked quantity without any further manual intervention.

What is the correct shipment configuration to meet this requirement?

- A. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Create Shipment process.
- B. Disable Auto Confirm Picks and select the check box "Create Shipments" in Pick Wave Release Rule.
- C. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Confirm shipment process.
- D. Disable Auto Confirm Picks, select the check box "Create Shipments," and schedule the Confirm Shipment process.

Correct Answer: C

Question 16

Which three predefined orchestration groups should you use while assigning an orchestration process to fulfillment lines in process assignment rules? (Choose three.)

- A. Standard
- B. Model / Kit
- C. Order Type
- D. Shipment Set
- E. Order Attribute

Correct Answer: ABD Section: (none) Explanation

Explanation/Reference:

Question 17

Your company is a manufacturer and distributor of CTO type of products globally, and uses Global Order Promising to promise its orders. You recently noticed that the promising results are determining the expected sources globally but not the least-cost ones. You want to understand the logic used by the GOP engine to derive the least-cost source.

Identify the four cost elements used by the cloud Global Order Promising engine to achieve the Profitable-to-Promise objective? (Choose four.)

- A. Cost of internal transfers between organizations
- B. Storage Cost (when the cost of holding that item in inventory is high)
- C. Overhead Cost
- D. Resource Consumption Cost (in case the end item is to be manufactured)
- E. Component Cost
- F. Standard Cost at internal organizations

Correct Answer: ADEF Section: (none) Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cd/E56614_01/scmop_gs/FASCP.pdf (page 48)

Question 18

You have deployed the Extensible Flexfield (EFF) successfully but it is not visible in the order capture additional information section.

Identify the two reasons for this behavior. (Choose two.)

- A. The EFF definition is not frozen.
- B. The EFF segments are not defined correctly.
- C. The EFF compilation is not done.
- D. The custom extensible flexfields are not published.
- E. The EFF context is not associated with the page.

Correct Answer: DE

Question 19

Your company is using Order Management Cloud to capture orders, and has integrated with a legacy inventory application for order fulfillment. A fulfillment request needs to be aggregated and sent to an external inventory application.

What step would you perform to aggregate the request?

- A. Create a new custom task by using the Shipment Task Layer.
- B. Create a new custom task by using the Fulfillment Task Layer.
- C. Create a new custom task by using the Supply Task Layer.
- D. Configure a fulfillment task routing rule with aggregation criteria based on time limit or total number of lines.

Correct Answer: D

Question 20

The customer service representative in your company has received a request from a customer for appending additional quantity to an original sales order that has already been released to the warehouse. The sales order quantity revision has resulted in a new shipment line with the status "Ready to Release."

What action would you take to ship the new line by merging it with the original shipment?

- A. Run the process Create Shipments with the parameter Append Shipment set to Yes.
- B. Perform Pick Release by selecting the Append Shipment check box.
- C. Manually append the new line to the shipment.
- D. Run the process Create Shipments with the parameter Create Shipment set to Yes.

Correct Answer: C

Question 21

You want to perform Internal Material Transfer across Business Units and want to capture internal margin as part of revenue for the selling Business Unit.

Which mandatory task would you perform for this requirement?

- A. Configure Oracle Fusion Global Order Promising
- B. Manage Consumption Rules
- C. Manage Supply Execution Documentation Creation Rules
- D. Manage Supply Chain Financial Orchestration Transfer Pricing Rules
- E. Manage Supply Order Defaulting and Enrichment Rules

Correct Answer: A

Question 22

The orchestration process fulfillment task is performed by an external system and you need to register the connector to integrate the non-Fusion system.

Which two steps would you perform to invoke the external connector service endpoint URL? (Choose two.)

- A. Create a new web service connector to register the endpoint URL.
- B. Create a new fulfilment task service to register the endpoint URL.
- C. Create a new routing rule for the fulfilment task to call the endpoint URL.
- D. Create a new routing rule for the fulfilment task to call the connector.

Correct Answer: AD

Question 23

Which action must be performed on the orchestration process user interface to activate an orchestration process after the order orchestration configurations are completed?

- A. Download the generated orchestration process.
- B. Validate the orchestration process.
- C. Release the orchestration process.
- D. Release and deploy the orchestration process.

Correct Answer: B

Question 24

What is the configuration required to automatically calculate the Jeopardy Score and priority when an orchestration process is planned or re-planned?

- A. Schedule the process refresh and start the order promising server.
- B. Check the change mode parameter to Advanced on the orchestration process.
- C. Schedule the process plan orchestration processes.
- D. Check the Replan Instantly parameter in the orchestration process.

Correct Answer: A

Question 25

Which process requires the Release Planning recommendation process to be executed manually so that a supply order gets created?

- A. Manual orders using File Based Data Load
- B. Min-Max planning replenishing a transfer order
- C. Back-to-Back Order
- D. Drop Ship Order
- E. Min-Max planning replenishing a purchase request

Correct Answer: C

Question 26

In a Cloud Order Management implementation, a customer has order capture and fulfillment systems located across the globe. The customer would like to ensure that the time zone is reflected in each transaction based on the location of the entity.

What step is required in order to achieve this business requirement?

- A. Select the time zone when importing a transaction to the Order Management System.
- B. Select the time zone in user preferences when entering a transaction.
- C. Select the time zone by using the profile option in the Functional Setup Manager,
- D. Select the time zone during the configuration of the Source system.

Correct Answer: C Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cd/E26401_01/doc.122/e22953/T174296T575363.htm

Question 27

Your company has a single global installation that contains Oracle Cloud Product Management, Oracle Cloud Trading Community Model, and Cloud Order Management. It has all the execution systems implemented in tandem with Global Order Promising. The Master data elements have also been migrated to their respective areas. The next step is to run the date collection program to load the planning data repository.

Which five data elements will the collection program load into the planning data repository? (Choose five.)

- A. Currencies

- B. Shipping methods
- C. Suppliers
- D. Customers
- E. Items
- F. Cross-referenced data
- G. Calendars

Correct Answer: CDEFG Section: (none)Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cloud/latest/scmcs_gs/FASCP/FASCP2173675.htm#FASCP2173675

Question 28

Your company is implementing Order Management Cloud to manage the sales orders but fulfilment happens through third party logistics (3PL).

What process should be executed to communicate to the 3PL system that the sales orders are ready to pick release and ship?

- A. Manage Shipments Interface
- B. Create Shipments
- C. Confirm Shipments
- D. Generate Shipments Request
- E. Send Shipments Advice

Correct Answer: D Section: (none) Explanation

Explanation/Reference:

Reference https://docs.oracle.com/cd/A60725_05/html/comnls/us/oe/dbpkrls.htm

Question 29

Your company wants to revise an existing sales order in Order Management Cloud to compensate the downstream legacy fulfillment system that does not allow any update to the already interfaced fulfillment lines.

What type of compensation pattern rule would you need to define for the orchestration process fulfillment step?

- A. Define one rule of type CREATE.
- B. Define one rule of type UPDATE.
- C. Define two rules: one of type CANCEL and another of type CREATE.
- D. Define one rule of type CANCEL_CREATE.

Correct Answer: C

Question 30

You are revising a sales order by manually scheduling the following fulfillment line and splitting it. Which three order attributes can be updated for the split line? (Choose three.)

Order	Fulfillment Line	Item	Item Description	Ordered Quantity	UOM	Order Line	Status	Warehouse	Orchestration Process Name	
74263	42370	CM6755020	8" Black Case with Bluetooth Keyboard	10	Ea	1	Manual Scheduling Required	Atlanta	DOO_OrderFulfillment GenericProcess	17.

- A. Fulfillment Line shipment method
- B. Fulfillment Line warehouse
- C. Fulfillment Line scheduled ship date
- D. Fulfillment Line unit selling price
- E. Fulfillment Line quantity

Correct Answer: ACE

Question 31

Your company wants a category of goods to be globally sourced for certain regions in Europe. After setting up the sourcing rules, you attempt to assign them by using the Category and Region option, but the category is not on the list of values.

What is the problem?

- A. The Default Sourcing Assignment Set profile option is not set.
- B. The category set that is associated with the Sourcing Rule Category Set profile option is controlled at the organization level.
- C. The Default Sourcing Assignment Set profile option is set to a category set for the Item category set structure.
- D. A category set has not been selected under the Sourcing Rule Category Set profile option.

Correct Answer: A

Question 32

Identify the transformation type in which a transactional item attribute is used for transforming a product. The transformation may be added to the existing product or replace the product on the sales order for a CTO item.

- A. Attribute to Product
- B. Product to Product
- C. Context to Product
- D. Attribute to Attribute

Correct Answer: A Section: (none)Explanation

Explanation/Reference:

Explanation An attribute-to-product transformation uses transactional attributes to transform an attribute to an item number. It can add the transformation to an existing item or replace the item that the source order references. Assume your company receives orders for an MP3 player that includes a Color attribute and a Size attribute, and that you must use a combination of these attributes to reference an item number. In the following example, a transformation rule transforms the Color and Size attributes of the Mini Plus item to the VIS481 item. Order Management displays VIS481 on the order line.
