Question 1

A master inspection characteristic is an inspection characteristic that has been defined for frequent use in task lists or should be evaluated for all inspection plans.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 2

If you work without a change number, the old values in the task list are overwritten by new values.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 3

The audit plan is hierarchically structured.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 4

The BAPI technology allows the customer to implement customer-specific selection and mapping procedures.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 5

In inspection planning, you create material-related information that is used when this material is inspected.

A. Incorrect B. Correct

Correct Answer: B

Question 6

An activity consists of the following elements (more than one answer is true):

- A. Long text
- B. Processing quality factor
- C. Short test
- D. Processing deadlines
- E. Catalog entry

Correct Answer: ABD

Question 7

Which statements are correct? (More than one answer is true.)

- A. You can determine the calibration intervals using maintenance strategies or a maintenance cycle.
- B. Test equipment is managed as an equipment master record.
- C. Inspection characteristics can be included in the maintenance task list for the equipment or in the general task list, in the form of master inspection characteristics or task list characteristics.
- D. You use the maintenance plan to link the required master data and to schedule the calibration inspection.

Correct Answer: AC

Question 8

Which statements are correct? (More than one answer is true.)

- A. The certificate can be transferred as a PDF file.
- B. You can monitor the receipt of a quality certificate with and without inspection lot processing, independently of the time of goods receipt.
- C. You can electronically send and receive quality certificates for a delivery.
- D. You can make it possible for your customers to access quality certificates on the Internet.

Correct Answer: ABC

Question 9

The work performed and costs incurred during results recording or when the usage decision is made can be confirmed in a QM order.

- A. Using direct activity allocation
- B. In cost processing

Correct Answer: B

Question 10

In which of the following you can display the information for multiple specifications functions and evaluate them at characteristic level:

- A. Results Recording Worklist
- B. Record inspection results for the batch
- C. Record inspection results for the lot
- D. Record inspection results for the inspection point
- E. Record inspection results for the operation

Correct Answer: B

Question 11

Notification category 05 belongs to:

- A. Service notifications
- B. General notifications

- C. Claim notifications
- D. Quality notifications
- E. Maintenance notifications

Correct Answer: B

Question 12

A notification item consists which of the following elements? (More than one answer is true.)

- A. AssemblyBill of material item
- B. Catalog entry for defect location
- C. Number of defects identified
- D. Catalog entry for defect type (defect class)

Correct Answer: BCD

Question 13

You can use the Quality Notifications to support the RMA (Return Material Authorization) process in your company.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 14

These are prerequisites to inspection lot creation: The inspection type is active in the material master QM is active in the table of movement types

- A. Incorrect
- B. Correct

Correct Answer: B

Question 15

The dynamic modification rule defines the inspection stages and the conditions for an inspection stage change.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 16

Which statements are correct? (More than one answer is true.)

- A. The MPN profile defines how you can work with MPN materials in the procurement process.
- B. Stock posting is generally performed in the Quality unit of measure of the material.
- C. An manufacturer part number profile (MPN profile) is assigned to an internal material in the material master.
- D. The function group QEVA_ALT_QUANTITY_INPUT contains coding that makes it possible to enter quantities in alternative units of measure.

Correct Answer: AC

Question 17

An InfoSet can be assigned to several user types.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 18

Which statements are correct? Sampling plan dependent on _____. (More than one answer is true.)

- A. Inspection
 - B. Variable
 - C. Lot size intervals
 - D. severities/AQL value
- Correct Answer: ACD

Question 19

You can define several follow-up functions that belong to the same process and that are to be performed in a specific sequence.

- A. Correct
 - B. Incorrect
- Correct Answer: A

Question 20

You cannot control inspection lot creation (lot combination) using the inspection type in the material master.

- A. Incorrect
 - B. Correct
- Correct Answer: A

Question 21

The function group QEVA_ALT_QUANTITY_INPUT contains coding that makes it impossible to enter quantities in alternative units of measure.

- A. Incorrect
 - B. Correct
- Correct Answer: A

Question 22

Business Content has the following preconfigured objects (more than one answer is true):

- A. Characteristics
 - B. InfoCubes
 - C. Key figures
 - D. Variables
- Correct Answer: ABC

Question 23

QM cannot be used to set a payment block for the goods receipt invoice.

- A. Incorrect
 - B. Correct
- Correct Answer: A

Question 24

You can assign an already existing QM order to a quality notification.

- A. Incorrect
 - B. Correct
- Correct Answer: B

Question 25

You can create the QM order from the quality notification.

- A. Incorrect
 - B. Correct
- Correct Answer: B

Question 26

Only closed notifications of notification origin Q2 and status “caused externally” are included in the grade determination for the subcriterion “complaint”.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 27

Insp with spec. means: You inspect the inspection characteristics that are specified in an inspection plan, routing, or master recipe.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 28

Which statements are correct? (More than one answer is true.)

- A. The procurement data in the Quality Management view affects sales.
- B. You use the inspection setup to define if and where the material is to be inspected.
- C. During inspection planning, you access different master data.
- D. QM-specific data is maintained at plant level.

Correct Answer: BCD

Question 29

Which statements are correct? (More than one answer is true.)

- A. You cannot assign an individual inspection plan to each inspection type and status.
- B. The status profile stipulates a sequence for inspection lot processing.
- C. A further goods receipt for the material and delivery is only possible for the model lot if the usage decision was “OK”.
- D. A further goods receipt for this material/vendor is not possible if the model inspection has not been completed.
- E. The inspection lots can be processed simultaneously.

Correct Answer: BD

Question 30

Which statements are correct? (More than one answer is true.)

- A. You use control charts to control or monitor one or more processes. In the task list characteristics, you use the SPC criterion to define these processes are to be combined or separated from one another (which inspection lots refer to a common control chart).
- B. The SPC criterion controls how processes are combined or separated for a control chart (that is which inspection lots refer to a common control chart).
- C. You make the preparations for a control chart in the sampling procedure and the task list or master inspection characteristic.
- D. You cannot use the control chart to evaluate inspection results. If an appropriate valuation rule is used, a sample can be rejected if at least one of the action limits in the related control chart is exceeded.

Correct Answer: ABC

Question 31

Which statement is true?

- A. After the usage decision has been made, changes cannot be made to the characteristics.
- B. After the usage decision has been made, changes can be made to the characteristics.

Correct Answer: A

Question 32

Which statement is false? A cause consists of the following elements (choose one):

- A. Short text
- B. Catalog entry
- C. Long text
- D. Catalog text

Correct Answer: D

Question 33

Which are belongs to Quality Notifications Activities? (More than one answer is true.)

- A. Defect analysis
- B. Results recording
- C. Sample management
- D. Priority
- E. Documentation
- F. Defects recording

Correct Answer: ADEF

Question 34

The QM System entered in the quality info record overrides the QM system entered in the vendor master record.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 35

Which statements are correct? (More than one answer is true.)

- A. You cannot assign an already existing QM order to a quality notification.
- B. QM orders can be settled to different account assignment objects.
- C. The controlling area always forms the first step in the hierarchy of an evaluation.
- D. The confirmation to a QM can be performed using direct activity allocation.

Correct Answer: ABC

Question 36

A unit to be inspected corresponds in this function to:

- A. a serial number
- B. a single unit
- C. both

Correct Answer: B

Question 37

Which statements are correct? (More than one answer is true.)

- A. All are false.
- B. In Customizing, you can deactivate the quality inspection for certain movement types.
- C. In the Standard System, all goods movements, for which inspections can be performed, have suitable inspection lot origins assigned to them.
- D. Results recording can only be carried out after the sample size has been determined.

Correct Answer: BCD

Question 38

Which notification type related to "Complaint against vendor"?

- A. notification type F4
- B. notification type F2

- C. notification type F3
 - D. notification type F1
- Correct Answer: B

Question 39

Inspection results are updated depending on the settings of the following parameters (more than one answer is true):

- A. Material, customer
 - B. Material, Quantity
 - C. Material, vendor
 - D. Material
 - E. Material, Value
- Correct Answer: ACD

Question 40

If the inspection plan and inspection lot have been approved, you cannot include additional unplanned characteristics.

- A. Incorrect
 - B. Correct
- Correct Answer: B

Question 41

You can create a where-used list for the following QM-specific master data (more than one answer is true):

- A. Inspection Methods
 - B. Code groups
 - C. Test equipment (PRT)
 - D. Sampling Procedure
 - E. Master Inspection Characteristics
- Correct Answer: ABD

Question 42

Statistical process control: Standardized statistical value for evaluating the quality of an inspection lot. The statistical value always has a specific reference criterion (such as a material or the material/vendor combination).

- A. Incorrect
 - B. Correct
- Correct Answer: A

Question 43

The unit of measurement, target value, accuracy, and upper and lower specification limits are defined for each tolerance key.

- A. Incorrect
 - B. Correct
- Correct Answer: B

Question 44

Which statements are correct for handling unit? (More than one answer is true.)

- A. Each handling unit has an identification number on the basis of which information can be read
 - B. Packaging materials (such as pallets, boxes, vacuum packaging, or containers)
 - C. Goods (that have to be transported and stored, for example)
 - D. Handling Units such as numbers forklift, tractors, cranes etc.
- Correct Answer: ABC

Question 45

Which statement is correct?

- A. In the standard system, inspection type “14” is reserved for the calibration inspection.
- B. In the standard system, inspection type “41” is reserved for the calibration inspection.

Correct Answer: A

Question 46

QM is integrated in the processes of the logistics supply chain.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 47

If a delivery for a product or a material is created, then QM automatically generates an inspection lot for the inspection relevant delivery items.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 48

Follow-up functions that support complaints against the vendor are (more than one answer is true):

- A. Transfer posting of material from blocked stock to unrestricted-use stock
- B. Finding the vendor of the material and assigning him or her to the notification
- C. Transfer posting of material from blocked stock to inspection stock
- D. Finding the purchasing document for the material and assigning it to the notification

Correct Answer: BD

Question 49

The inspection lot data record contains the data relevant to you for the current quality inspection.

This data includes:

- A. Information regarding inspection lot creation
- B. Specifications regarding the execution of the inspection
- C. The specified inspection lot quantity, sample size, and stock-relevant quantity
- D. All are false

Correct Answer: A

Question 50

If the usage decision has been made for an inspection lot, an additional inspection lot cannot be created for a production version.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 51

A material-dependent selection of defect codes cannot be planned.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 52

When editing a bill of material or task list with the classic transactions, the whole structure is locked to other users.

- A. Incorrect

B. Correct

Correct Answer: B

Question 53

Which statements are correct? (More than one answer is true.)

A. You perform a defect analysis on the returned goods and enter the defects in the notification.

B. If an inspection lot is used, the usage decision determines the next stage for the goods; if no inspection lot is used, a specific inventory posting can be made.

C. Repairs Processing Using an Inspection Lot.

D. Instead of using the quality notification to process the returned goods, you can create an inspection lot.

Correct Answer: BCD

Question 54

Worklist for tasks, transaction IQS9.

A. Correct

B. Incorrect

Correct Answer: A

Question 55

Flexible inspection specifications are to be used where inspections can be fully planned in advance.

A. Incorrect

B. Correct

Correct Answer: A

Question 56

The characteristics and key figures in the QM information System allow you to pinpoint and monitor weak points in your logistical processes.

A. Incorrect

B. Correct

Correct Answer: B

Question 57

Confirmation at Reporting point is available for ____.

A. Discrete Manufacturing

B. Process Manufacturing

C. Repetitive Manufacturing

D. For all

Correct Answer: B

Question 58

Which are different processing options in the worklist?

A. Details for task list header

B. General settings for task list headers

C. QM-relevant settings for task list headers

D. Administrative data for task list headers

Correct Answer: A

Question 59

Process-optimized results recording enable flexible tabular characteristic processing.

A. Correct

B. Incorrect

Correct Answer: A

Question 60

The notification category 05 belongs to _____.

- A. Claim notifications
- B. General notifications
- C. Maintenance notifications
- D. Quality notifications
- E. Service notifications

Correct Answer: B

Question 61

The Java Dispatcher execute the required Java code in one thread, adopt database accesses and make requested Web sites available.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 62

If you do not use a sampling scheme in a sampling procedure, you should not use the inspection severities "Tightened", "Normal", or "Reduced" in the dynamic modification rule.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 63

You specify the business purpose of the quality notification when you define the notification type.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 64

Which statements are correct? (More than one answer is true.)

- A. A customer complaint can be recorded using the Internet.
- B. Documents cannot be assigned while processing a notification.
- C. You can access a sales summary from a customer complaint.
- D. You can switch directly to notification processing from the defects recording transaction.

Correct Answer: ABD

Question 65

You can only create inspection characteristics for operations, not for suboperations.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 66

If a planned inspection has inspection characteristics assigned to it, then _____.

- A. the assignment of the sampling procedure takes place at the inspection setup in the QM view of the material master.
- B. the assignment of the sampling procedure takes place at inspection characteristic level.

Correct Answer: B

Question 67

You can display the results history with reference to ____.

- A. the type
- B. inspection lot number
- C. the Group
- D. the batch.

Correct Answer: ACD

Question 68

A notification item consists which of the following elements? (More than one answer is true.)

- A. Short text/long text
- B. Classification
- C. Nonconforming quantities
- D. Defect valuation

Correct Answer: BD

Question 69

The valuation rule contains a valuation mode.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 70

The certificate type determines (more than one answer is true):

- A. Whether a certificate is needed for each purchase order item
- B. How the system reacts if the certificate is not available at goods receipt
- C. Whether a certificate is needed for each goods receipt
- D. All are false

Correct Answer: BD

Question 71

Which statements are correct? (More than one answer is true.)

- A. The inspection result can be stored in the system in different ways.
- B. The QM inspection is not activated in the material master.
- C. The quality inspection for an outbound delivery is necessary to check the quality of material or product before it leaves the premises of the manufacturer or vendor.
- D. mySAP ERP Quality Management (QM) supports sales and distribution processes by executing quality inspections for goods issues.

Correct Answer: ACD

Question 72

An inspection can be triggered at different stages in the logistics supply chain which includes (more than one answer is true):

- A. Goods movements (goods receipt, stock transfer, goods issue)
- B. Deadline monitoring (batch monitoring)
- C. Source inspections
- D. Orders (production orders, maintenance orders, delivery)

Correct Answer: ABD

Question 73

Characteristics must be manually valuated, if they have sampling procedure assigned in the task list or material specification, or not having a sampling procedure with manual valuation.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 74

The valuation type is defined in the sampling procedure using the valuation mode.

- A. Correct.
- B. Incorrect

Correct Answer: A

Question 75

You can access the inspection history from (more than one answer is true):

- A. The usage decision
- B. Inspection type
- C. Inspection report
- D. Results recording

Correct Answer: AD

Question 76

If the maximum possible lot size is exceeded, the sample size for the maximum possible lot size is used.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 77

You can use quality notifications in all areas of the logistics supply chain.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 78

The following notification origins exist for the notification category 02 (quality notifications) (more than one answer is true):

- A. Q3, Internal problem notification
- B. G1, General notification
- C. Q1, Customer complaint
- D. Q2, Complaint against a vendor

Correct Answer: BCD

Question 79

Which statements are correct? (More than one answer is true)

- A. Input processing for measured values is possible for all inspection characteristics.
- B. Master inspection characteristics that are created as an “incomplete copy model” can only be used in task lists.
- C. Master inspection characteristics can be referenced in task lists. Central maintenance is then possible.
- D. Change documents are created during mass maintenance of the inspection setup.
- E. History management is not possible for master inspection characteristics.

Correct Answer: ABD

Question 80

The certificates for the delivery items are created when goods are received.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 81

The use of the material specification is independent on the inspection setup in the Quality Management view of the material master.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 82

Stock posting is generally performed in the base unit of measure of the material.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 83

You cannot enter individual code groups or all code groups for a catalog.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 84

Object dependencies are Mutual dependency between objects.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 85

The following inspection lots cannot be selected: Inspection lots with inspection point processing, SD inspection lots with partial lots, and inspection lots that require a digital signature.

- A. Correct
- B. Incorrect

Correct Answer: A

Question 86

An enterprise portal must provide access to information respective of its storage location.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 87

Business Content provides the range of information that your employees require to be able to complete their tasks.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 88

Which statements are correct? (More than one answer is true.)

- A. Dynamic modification should be used to reduce the size of samples and for inspection skip.
- B. If the maximum possible lot size is not exceeded, the sample size for the maximum possible lot size is used.
- C. Dynamic Modification is used so that inspection costs can be reduced as a result of high

quality.

D. If the unit of measurement for the inspection lot does not consist of single units, then the lot size is determined by dividing the lot quantity by the sample quantity.

Correct Answer: ACD

Question 89

The inspection lot forms the basis for inspection processing.

A. Correct

B. Incorrect

Correct Answer: A

Question 90

You can create a maintenance plan with or without a maintenance strategy.

A. Incorrect

B. Correct

Correct Answer: B

Question 91

The QM order has order category "06".

A. Correct

B. Incorrect

Correct Answer: A

Question 92

Which statements are correct for QM related to MM? (More than one answer is true.)

A. The QM data recorded in procurement for a goods receipt provides the purchasing department with the information required for evaluating vendors.

B. You can block the delivery of goods from a vendor as a result of the GR results.

C. The quality information record procurement controls whether a source inspection or a goods issue inspection takes place the vendor's goods.

D. After a source inspection takes place, then GR inspection is carried out

Correct Answer: ABC

Question 93

The function module can be called before, after or at the same time as the notification is updated.

A. Correct

B. Incorrect

Correct Answer: A

Question 94

Results' recording is possible over the Internet.

A. Correct

B. Incorrect

Correct Answer: A

Question 95

The system supports the following certificate receipt scenarios:

A. Certificate receipt for the purchase order item with inspection lots after the usage decision

B. Certificate receipt for the purchase order item without an inspection lot after goods receipt

C. Certificate receipt for the purchase order item with an inspection lot after goods receipt

D. Certificate receipt after goods receipt

E. Certificate receipt at goods receipt

Correct Answer: ABCD

Question 96

A system status is predefined in the system and cannot be changed.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 97

The following object types are delivered in the standard system (more than one answer is true):

- A. Customer
- B. Wor Center
- C. Pharmacopoeia
- D. Country

Correct Answer: ACD

Question 98

A customer complaint to be recorded in the following ways (more than one answer is true):

- A. The “quality assurance” department is notified using the SAP Business Workflow
- B. You create a notification with reference to an SD document.
- C. You create a notification with reference to a purchase document.
- D. You enter a general description of the problem and save the notification.

Correct Answer: AB

Question 99

The maintenance strategy can be time-based but cannot be performance-based.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 100

The code groups and codes are maintained in multiple transaction.

- A. Correct
- B. Incorrect

Correct Answer: B

Question 101

Which processing stage refers to “Stock posting completed”?

- A. SPCD
- B. SPCL
- C. SPCO
- D. SPST

Correct Answer: A

Question 102

During inspection planning, you cannot access different master data.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 103

Which statements are correct? (More than one answer is true.)

- A. An inspection lot can be created automatically or manually.
- B. Results recording cannot be carried out after the sample size has been determined.

- C. When the indicator “QM procurement active” is set, quality management in procurement is activated for all plants of a client.
- D. Details for the QM specific procurement processes as plant level are determined using the QM control key.
- Correct Answer: AD

Question 104

You can monitor the receipt of a quality certificate with and without inspection lot processing, independently of the time of goods receipt.

- A. Correct
- B. Incorrect
- Correct Answer: A

Question 105

You can assign follow-up actions to the codes in the code groups of the task catalog.

- A. Incorrect
- B. Correct
- Correct Answer: B

Question 106

The following inspection lots cannot be selected: inspection lots with inspection point processing, SD inspection lots with partial lots, and inspection lots that require a digital signature.

- A. Incorrect
- B. Correct
- Correct Answer: B

Question 107

In warehouse management, the goods receipt inspection is processed using inventory management. The system creates a quant on the interface and, depending on the system settings, creates a transfer requirement in WM.

- A. Incorrect
- B. Correct
- Correct Answer: B

Question 108

Which statements are correct? (More than one answer is true.)

- A. An inspection method can also be directly created in a task list.
- B. Documents can be assigned to an inspection method.
- C. Code groups and codes from one catalog type can be grouped together in selected sets.
- D. Codes from selected sets can be used for results recording.
- E. No code groups from catalogs can be assigned to an inspection method.
- Correct Answer: ABC

Question 109

You can transfer data from the internal problem notification to the external notification.

- A. Correct
- B. Incorrect
- Correct Answer: A

Question 110

Activity: Which statement is correct?

- A. Work that was carried out for a notification.
- B. Work that is planned for a notification.

Correct Answer: A

Question 111

Which statements are correct for QM in Information Management? (More than one answer is true.)

- A. If the predefined critical tolerances are not exceeded, the system can automatically trigger follow-up actions.
- B. You can compare the data with preplanned scores.
- C. You can also define your own analyses based on characteristics and scores.
- D. The data in the Information System is updated continuously with results of the standard and event-controlled processes.
- E. The ECM in the Quality Information System (QMIS) allows you to monitor critical values.

Correct Answer: BCD

Question 112

SAP xApps (Composite Applications).

- A. Groups all cross-industry business applications.
- B. Allow you to integrate various systems into one user interface.
- C. It is the technological infrastructure for all SAP applications.
- D. All are true.

Correct Answer: A

Question 113

Codes from different code groups within the same catalog type can be grouped together in selected sets.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 114

The standard workflow processes in the notifications area are always active.

- A. Incorrect
- B. Correct

Correct Answer: A

Question 115

Which statements are correct? (More than one answer is true.)

- A. The basic data cannot be maintained in other recording views (for example, the purchasing view). As a result, this data may already be maintained.
- B. The procurement data affects the ordering transaction.
- C. The inspection setup specifies, if and how a material is to be inspected.
- D. QM-specific data must be maintained at plant level.

Correct Answer: BC

Question 116

You can edit individual operations from various task lists in your worklist without exiting the transaction.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 117

Which are related to “Function group QMLR”? Which statements are correct? (More than one

answer is true.)

- A. Create/edit a return delivery
- B. Assign purchasing document
- C. Create a new quality notification including the items
- D. Performing stock postings
- E. Assign vendor

Correct Answer: ADE

Question 118

You can use a follow-up function to trigger a Workflow task.

- A. Incorrect
- B. Correct

Correct Answer: B

Question 119

The interaction of quality management in these processes is not supported by an EDP system.

- A. Correct
- B. Incorrect

Correct Answer: B

<http://www.aowe.com/>
