Vendor: Microsoft

Exam Code: 70-331

Exam Name: Microsoft Core Solutions of Microsoft SharePoint Server 2013

Version: DEMO
Topic 1, Large Company

Background
You are the SharePoint administrator for a large company. You are responsible for installing and configuring a multi-server SharePoint environment that will be used for information management and collaboration.

The company has an Active Directory Domain Services (AD DS) domain. User-specific contact information, including employee photos, is stored and managed in Active Directory. All employees are located in the ActiveUsers organizational unit (OU).

The User Profile Synchronization service runs on a server named SERVER1.

Business Requirements
The SharePoint environment must meet the following business requirements:

- Ensure that users can connect to the portal by using the same URL from any location.
- Ensure that users can access corporate information from outside the network without using a VPN connection.
- Allow users to configure notifications for content changes.
- Allow users to follow content creators.
- Limit the number of sites and people each user can follow to 100.
- Allow content authors to upload documents, large image files, and large video files for consumption by internal and external users.
- Allow administrators to promote search query results across the entire company.
- Utilize My Sites to share content.
- Provide opportunities for social interaction.

Technical Requirements
You must meet the following technical requirements for the SharePoint environment:

- Do not exceed the minimum hardware specifications.
- Install the minimum supported versions of all software on the servers.
- Control the growth of storage utilization.
- Maximize existing content database usage before creating new content databases.
- Store large files on network attached storage (NAS).
- Ensure that all web applications, site collections, files, databases, and components stay within the supported limits.
- Configure the User Profile Synchronization service to import user profile data from Active Directory.
- Grant the User Profile service account the least permissions necessary to read data.
- Ensure that current and future SharePoint environments include the most recent software
• Use predefined database naming conventions.
• Create individual user sites by using the https://contoso.com/personal/path.

QUESTION 1
You create a User Profile Synchronization connection. You need to grant the necessary permissions to the synchronization account. What should you do?

A. Grant the account Full Control on the ActiveUsers OU.
B. Grant the account Full Control on the AuthenticatedUsers AD security group.
C. Grant the account Read permission on the domain.
D. Grant the account the Replicate Directory Changes permission on the domain.

Correct Answer: D

QUESTION 2
You need to ensure that content authors can publish the specified files. What should you do?

A. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
B. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in the authoring site collection, and enable anonymous access to the library on the authoring web application.
C. Create one authoring site collection. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
D. Create multiple authoring site collections. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.

Correct Answer: B
QUESTION 3
HOTSPOT
You need to ensure that user-selected subscription content automatically appear on users' My Sites. Which configuration option should you choose? (To answer, select the appropriate option in the answer area.)

Hot Area:
QUESTION 4
You need to import employee photos into SharePoint user profiles by using the least amount of administrative effort. Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

A. Define a mapping for the thumbnailPhoto attribute of the Picture user profile property.
B. Run the Update-SPUserSolution Windows PowerShell cmdlet.
C. Run an incremental synchronization of the User Profile Synchronization service.
D. Run a full synchronization of the User Profile Synchronization service.
E. Run the Update-SPProfilePhotoStore Windows PowerShell cmdlet.
F. Define a mapping for the photo attribute of the Picture user profile property.

Correct Answer: DE
