A. Public class MyComp extend UIComponent
B. Public class MyComp implements UIComponent
C. Public class UIComponent as MyComp
D. Public class MyComp base UIComponent

Answer: A

QUESTION NO: 3
Given the following code:
user firstName = "Bruno";
Which declaration would enable you to set the firstName property as shown?
A. public function setFirstName (value String):void{}
B. public function getFirstName(): String{
C. public function get firstName():void{}
D. public function set firstName(value String):void{}

Answer: D

QUESTION NO: 4
Which statement describes ArrayList and ArrayCollection components?

A. Both ArrayList and ArrayCollection can be used as data providers for Spark list-based controls
B. ArrayList collection are sortable and filterable
C. When using an Array as a data provider for a Spark list-based control, it will automatically be wrapped within ArrayList
D. ArrayList supports cursors, unlike ArrayCollection

Answer: A

QUESTION NO: 5
When design pattern is used to define the passing of typed data between the client and remote server?

A. Mediator
B. Factory
C. Façade
D. Data transfer Object

Answer: D

QUESTION NO: 6
What is the return type of the E4X statement:
imageData.image

A. XML
B. XMLList
C. String
D. Array

Answer: A

QUESTION NO: 7
Given the following snippet
var ac ArrayCollection = new ArrayCollection();
ac.addItem(0).
ac.addItem(1).
ac.addItem(2).
ac.addItem(3).
ac.addItemAt(2,l).
var kuint = ac[1]

What is the value of k?
A. 0
B. 1
C. 2
D. 3

Answer: B

QUESTION NO: 8
Give the ActionScript class:

public class MyClass implements IResizable { }

What can be said about MyClass?
A. MyClass inherits all the functionality of the IResizable class
B. MyClass is the super class of the IResizable class
C. IResizable is the super class of MyClass
D. MyClass must have all methods defined in IResizable

Answer: D

QUESTION NO: 9
Which statement describes the access rules for a variable marked as private?
A. Any class
B. Any class that extends the class
C. The class itself
D. Other classes in the same package

Answer: C
QUESTION NO: 10
Which annotation is used in an ActionScript class to map it to a corresponding Java class
A. [RemoteObject]
B. [Bindable]
C. [RemoteClass]
D. [ClassMap]
Answer: C

QUESTION NO: 11
Which code correctly defines the instructor to the Circle class?
package
{
import flash display Sprite.
Public class Circle extends Sprite
{

...Code here...

Super();
}
}
A. private fund public fund()
B. public fund public fund()
C. public function Circle() void()
D. public Circle()
Answer: C

QUESTION NO: 12
Which statement about using validators is true?
A. You must directly invoke the validate method for each Validator object
B. You may validate using static methods of the Validator class instead of using a Validator object
C. A Validator object may be used for only one field
D. You can invoke all validation tests using the validate All method of the Validator class
Answer: A

QUESTION NO: 13
Which tag does NOT implement the Flex RPC API?
A. RemoteObject
B. Consumer
C. HTTPService
D. WebService
Answer: B

QUESTION NO: 14
Which two statements about HTTPService, WebService and RemoteObject are true? (Choose two.)
A. Service invocations to other sub-domains may fail without crossdomain xml
B. WebService supports the invocation of SOAP and XML-RPC web services
C. WebService and RemoteObject can only be used with SOAP web services
D. RemoteObject will be faster than an equivalent WebService due to the use of AMF
E. HTTPService cannot be used to retrieve XML
Answer: B,D

QUESTION NO: 15
Which two statements about model-driven development are true? (Choose two)
A. End-to-end model-driven development is not possible with Flash Builder
B. End-to-end model-driven development requires Flash Builder, the Application Modeling plug-in and a JDBC data source available LCDS
C. Model-driven development of client code cannot use an existing LCDS destination

D. Model-driven development of client code is implemented using LCDS or ColdFusion with any Flex data sources

E. Model-driven development of client code can be used to generate a database schema exactly corresponding to the structure of the model

Answer: B
