**QUESTION NO: 7**

You are a business analyst in an organization that has recently embraced business analysis as part of its initiative for new projects. In this organization, there is not an organizational standard for tailoring business analysis duties and expectations. Which one of the following best describes the action that you should take to begin business analysis?

- A. Take charge and begin the business analysis activities, but document your approach to serve as a template for future business analysis initiatives.
- B. Work with the appropriate stakeholders to determine how the business analysis work should be completed.
- C. Define the organizational standard first.
- D. Create a business case for the need for organizational standards for business analysis.

**Answer: B**

**QUESTION NO: 8**

An organization has invested \$750,000 into a technology to help secure, automate, and communicate customer ordering. The solution has worked well for the past six months, but a newer technology has been developed that surpasses the abilities of the current solution and solves many defects and issues the company has with the existing solution. Purchasing the newer solution, however, means that the company will have to discard the solution that's only been in

place for the past six months. What term can be assigned to the monies already implemented into the existing solution?

- A. Cost of nonconformance
- B. Sunk costs
- C. Opportunity cost
- D. Cost-benefits

**Answer: B**

**QUESTION NO: 9**
