Exam Code: e20-522
Exam Name: clariion solutions specialist exam for storage administrator
Vendor: EMC
Version: DEMO
Part: A

1: What is a SAN Copy supported session type?
A. Full
B. Partial
C. Delayed
D. Restartable
E. Host initiated
Correct Answers: A

2: When entering a Navisphere CLI command, which variable specifies the CX-Series Storage Processor that will accept the command?
A. -h [hostname]
B. -d [devicepath]
C. -sp [storage processor]
D. -ip [ip address of storage processor]
Correct Answers: A

3: Click the Task button. In what order should you prepare a CLARiiON LUN for mounting on a Solaris host?

Correct Answers:

Steps in Order

1. (place step one here)
2. (place step two here)
3. (place step three here)
4. (place step four here)

Steps to be moved

Label Disk
Partition Disk
Create Mount Point
Create File System

Done
4: How is the MirrorView Fracture Log configured?
A. Bind at least one unused LUN
B. Make sure LUNs are at least 128MB
C. The Fracture Log is automatically configured
D. Allocate SP Memory in the Memory tab of the Primary Storage System
Correct Answers: C

5: How does a SnapView Snapshot maintain a "point-in-time" copy of a source LUN?
A. Creating a virtual copy of the LUN and by using the COFW mechanism.
B. Copying the changed data of the source LUN to the SP Write Intent Log.
C. Copying incremental data at the start of the Snapshot session to the Snapshot cache.
D. Copying all source LUN data, at the start of the Snapshot session, to the Snapshot cache.
Correct Answers: A

6: What must occur before the write operation is acknowledged to the host in normal MirrorView operation?
A. Link status must be checked
B. Fracture Log must be updated
C. Write is acknowledged on secondary array
D. Write Intent Log must be enabled for the Primary LUN
Correct Answers: C

7: Where is the user notification information for Event Monitor stored?
A. agent.cfg
B. event.cfg
C. navimon.cfg
D. agent.config
8: Which three [3] options can be configured in the reate RAID Group?dialogue box?
A. RAID Type
B. RAID Group ID
C. Expansion Rate
D. Enable Write Cache
E. Manual Disk Selection
Correct Answers: B C E

9: Which three [3] options are available to connect and configure a switch?
A. Telnet
B. NAVICLI
C. Web GUI
D. Navisphere Agent
E. Serial Connection
F. Navisphere Manager
Correct Answers: A C E

10: At which level do you set the CLARiiON cache page size?
A. For each LUN
B. For Storage System
C. For read cache per Storage Processor
D. For write cache per Storage Processor
Correct Answers: B

11: What are four [4] statements that apply to configuring Snapshot cache LUN size?
A. Simulation mode can be used to estimate a suitable Snapshot cache LUN size.
B. Use of multiple smaller Snapshot cache LUNs results in less unused cache space
C. For each source LUN that is snapped a dedicated Snapshot cache LUN is required
D. Due to automatic LUN assignment, all Snapshot cache LUNs must be the same size
E. When a Snapshot cache LUN is full, SnapView allocates an available Snapshot cache LUN
F. Sessions running on the same source LUN will share space on the same Snapshot cache LUN
Correct Answers: B C E F

12: Which two [2] technologies are involved in VisualSAN "Discovery"?
A. WWN
B. SMTP
C. SNMP
D. SCSI mailboxes
E. Out-of-Band communication
Correct Answers: C E
13: Click the Task button. Match the appropriate Connectrix model number to its description.

Correct Answers:

14: Which phrase describes Access Logix?
A. Host masking via switch zoning
B. LUN masking via switch zoning.
C. LUN masking via storage groups
D. Enabling host access to FC switch
Correct Answers: C
