Exam Code: HP0-402
Exam Name: Implementing HP Enterprise Virtual Array Solutions
Vendor: HP
Version: DEMO
Part: A

1: Using Command View EVA, which attributes are displayed for HSV2x0 Controller Properties. Select THREE.
   A. mirror port states
   B. temperature sensors
   C. UPS voltage indicators
   D. cache battery module states
   E. levels of protection from shelf failures
   **Correct Answers: A B D**

2: What are two capabilities of the HP Command View EVAPerf? Select TWO.
   A. review port status
   B. creation of vdisks
   C. display SAN topology
   D. collect host connection data
   E. review capacity planning data
   **Correct Answers: A D**

3: What is the maximum number of disk enclosures for an EVA6000?
   A. 4
   B. 6
   C. 8
   D. 18
   **Correct Answers: C**

4: What does the EVA provide in a heterogeneous environment? Select TWO.
   A. mainframe support
   B. no single point of failure
   C. reliable and infinitely scalable
   D. modular and scalable storage
   E. preconfigured operating system solutions
   **Correct Answers: B D**

5: A customer requires a six hour call-to-repair commitment. Which minimum type of HP Care Pack Service is appropriate?
   A. HP Support Plus
   B. HP Critical Service
   C. HP 4 Hour, 24x7 Hardware Support
   D. HP Proactive Essentials 24x7 Unlimited
   **Correct Answers: B**

6: What is the best practice when adding disks to an EVA 2C8D for a Robust Availability Configuration?
A. After adding the disks, delete and recreate the disk group.
B. Add disks in multiples of eight; distributed evenly across the shelves.
C. Install any number of disks and assign each of them individually to the appropriate redundant storage set.
D. After installing a single disk, wait until leveling has taken place in the existing disk group before you install the next disk.

Correct Answers: B

7: Which methods are available to provide system administrators direct notification of Field Replaceable Unit (FRU) failures? Select TWO.
A. e-mail
B. RPC traps
C. SCMI traps
D. SNMP traps
E. syslog event

Correct Answers: A D

8: Which disks are used to optimize price per capacity for your EVA storage subsystem? Select TWO.
A. higher performance disks
B. near online disks
C. larger capacity disks
D. smaller capacity disks

Correct Answers: B C

9: Why would you consider configuring two separate disk groups instead of a single one? Select TWO.
A. higher availability
B. lower cost of ownership
C. higher storage efficiency
D. better database performance
E. better utilization of disk space

Correct Answers: A D

10: How many FC switched fabric connections are there on each M5314A drive enclosure?
A. 0
B. 2
C. 4
D. 8

Correct Answers: A
