Exam Code: HP0-728
Exam Name: Replication Solutions for the HP StorageWorks EVA
Vendor: HP
Version: DEMO
Part: A

1: Which events can you see in the Replication Solutions Manager?
A. only events that are related to DR groups
B. only the Continuous Access specific events
C. only events that are related to managed sets
D. all EVA events for the subsystems that are part of the Continuous Access environment
Correct Answers: D

2: Replication Solutions Manager receives Continuous Access event information directly from
   _____.
A. HSV controllers
B. Command View EVA
C. Systems Insight Manager
D. Storage Management Server Notification Utility
Correct Answers: A

3: Which three would result in a Replication Solutions Manager event? (Choose three.)
A. Vdisk failure
B. job completion
C. disk group created
D. transitioned to logging state
Correct Answers: A B D

4: Which two statements about Business Copy (BC) are true? (Choose two.)
A. BC is limited to 16 EVA storage systems.
B. BC supports an unlimited number of storage systems.
C. BC supports up to 25 servers running the BC host agent.
D. BC supports an unlimited number of servers running the BC host agent.
Correct Answers: A D

5: To be a Business Copy (BC) server, the Storage Management Appliance MUST have which three installed? (Choose three.)
A. BC server software
B. Command View EVA
C. SAN connection to a host
D. SAN connection to a HSV storage subsystem
Correct Answers: A B D

6: Where is the Business Copy (BC) server component installed in the diagram?
7: You are creating a DR group for a database. Which disk group is used for the write history log for the database DR group?
A. an empty disk group with 2 TB of space
B. a new disk group will get created for the log disk
C. 3 TB database disk group with 1 TB of free space
D. 5 TB windows disk group with 2 TB of occupied space
Correct Answers: D

8: A site loses intersite links for an extended period of time. When the links come back, all DR groups are merging. This causes a significant host performance issue. What are two recommended procedures used to enhance host I/O performance? (Choose two.)
A. detach some copy sets
B. issue a suspend command against some of the less critical copy sets
C. issue a suspend command against some of the less critical DR Groups
D. issue a suspend command against some of the less critical managed sets
Correct Answers: C D

9: Why does HP recommend synchronous replication mode over asynchronous replication mode?
A. Synchronous replication mode saturates at a lower rate.
B. Synchronous replication mode provides better data protection.
C. Write order is not assured using asynchronous replication mode.
D. Synchronous replication mode responds faster when the I/O rate is below saturation.
Correct Answers: B

10: Which two are valid Continuous Access EVA commands? (Choose two.)
A. failover
B. failback
C. failsafe mode enable
D. failsafe-locked enable

Correct Answers: A C
