Vendor: Microsoft

Exam Code: MB4-536

Exam Name: Microsoft Dynamics SL 7.0 Project Series

Version: DEMO
1: The Contract Type field in Project Maintenance is used for which of the following?
A. The field is informational only.
B. The AR Invoice Interface.
C. Allocation Processor
D. Project Budgeting

Correct Answers: B

2: Identify the field most commonly used for selection when defining reports in Flexible Report Column Maintenance.
A. Flexible Key
B. Project
C. General Ledger Account
D. Account Category

Correct Answers: D

3: Which of the following best describe how Project Charge Entry batches post when they are released?
A. Units and Amounts to Projects.
B. Debits and Credits to Projects.
C. Debits and Credits to the General Ledger.
D. Units and Amounts to Projects and Debits and Credits to the General Ledger.

Correct Answers: A

4: Which of the following best describes the logic between Budget and EAC?
A. Budgets are fixed amounts and EAC is an adjustable amount; once Budgets are entered they cannot be changed.
B. Budget amounts and units are used in the Revenue Recognition process.
C. EAC amounts and units are revised budget amounts used in the Revenue Recognition process.
D. EAC amounts are used for project charge entries.

Correct Answers: C

5: At what level(s) are Project Budgets and EACs created?
A. By General Ledger account.
B. At the Project level.
C. For an Account Category within a Task within a Project.
D. For a Task only within a Project.

Correct Answers: C

6: A project is set up in October of 2006, and costs and billings are generated. The Year-End Close process is run in Project Controller for 2006. If the Project Profitability Report is run in January of 2007, the PTD and YTD amounts are equal. What happened?
A. They did not close Project Controller Module in General Ledger for the Year.
B. The contract type was defined incorrectly in Project Maintenance. Selecting the correct contract type will change the PTD amounts.
C. There are no transactions for January 2007. Once transactions are entered, the PTD and YTD balances will be different.

D. The project is not set up to carry a balance forward at year-end. Check the box in Project Maintenance and re-run Year-End Close.

Correct Answers: D

7: In order to stop using an override percentage and resume using the system calculated percentage of completion, which option will work in the Percent Complete and Revenue Recognition Setup?

A. Clear out the Percent Complete field.
B. Clear out the Revision Date field.
C. Change the Percent Complete field to "0.00" and change the Revision Date to the current date.
D. Change the Percent Complete field to "0.00" and clear out the Revision Date.

Correct Answers: D

8: For any project related transaction to be eligible for transfer to a project via the Financial Transaction Transfer process the status must be?

A. Released
B. Posted
C. Balanced
D. In Process

Correct Answers: A
