Exam Code: tb0-103
Exam Name: tibco businessworks 5.x
Vendor: Tibco
Version: DEMO
Part: A

1: Which two installation modes prompt the user for information during the install process? (Choose two.)
A. GUI mode
B. Silent mode
C. Console mode
D. Unattended mode
E. Remote administration mode
Correct Answers: A C

2: What are the three benefits of BusinessWorks Process Engines using HTTP(S) for run-time initialization? (Choose three.)
A. HTTP(S) does not use multicast for failover.
B. The Process Engine advertises state over HTTP(S).
C. HTTP(S) may be used in conjunction with firewall security.
D. HTTP(S) allows direct, point-to-point access to the administration server.
E. HTTP(S) does not span network segments automatically and is therefore more secure.
F. HTTP(S) does not require additional network bridging software, making it simpler to set up.
Correct Answers: C D F

3: What, if any, are the restrictions of using the TIBCO Administrator GUI via a secondary server?
A. There are no restrictions.
B. The only restriction is that you cannot deploy applications from a secondary server.
C. You cannot perform any monitoring or management functions using the GUI until the secondary server is changed to READ_WRITE.
D. You cannot perform user management, deploy applications, or perform any other activity for which READ_WRITE access is required.
Correct Answers: D

4: What are four options for creating a TIBCO team building environment? (Choose four.)
A. Perforce
B. file sharing/locking
C. Visual SourceSafe
D. TIBCO XML Canon
E. TIBCO SmartMapper
F. TIBCO Adapter cross referencing
Correct Answers: A B C D

5: A BusinessWorks application you are developing uses JMS messaging where the messages only reside on the local campus. How should you implement conversation level security?
A. You can define the connection used by the message producers and consumers to use SSL. You also need to provide the appropriate certificates.
B. You can define the message producers and consumers to use PGM which encrypts all message content. You must also provide the appropriate certificates.
C. You can define the connection used by the message producers and consumers to use a VPN. The network security administrator must configure this for you.
D. You need to write a Java code activity to perform encryption (decryption) of the data before giving it to the message producer (or after getting from the message consumer).
**Correct Answers: A**

6: A new integration initiative in your department requires that both a test domain and a production domain be set up for your system integration staff. Due to heightened security, it is essential that all aspects of the environments be completely segregated. Which three actions must you take to achieve this? (Choose three.)
A. Install test and production TIBCO Administrator servers on machine A
B. Ensure that all Message Service Bus components are installed on a single network subnet
C. Ensure that each TIBCO BusinessWorks component belongs to only one appropriate domain
D. Ensure the TIBCO Runtime Agent network traffic for each domain is limited to a single network subnet
E. Install a test TIBCO Administrator server on machine A and a production TIBCO Administrator server on machine B
F. Ensure that the Message Service Bus naming conventions and settings are separate for test and production domains
**Correct Answers: C E F**

7: You want to use a host system to run deployed BusinessWorks process engines. Which two products must be installed on this host? (Choose two.)
A. Sun Java JRE
B. TIBCO Designer
C. TIBCO Administrator
D. TIBCO Runtime Agent
E. TIBCO BusinessWorks
**Correct Answers: D E**

8: What is a restriction on the consumption of JMS queue messages?
A. The JMS queue message consumers cannot use selectors.
B. There can only be one active consuming client per JMS queue.
C. A single JMS queue message can only be consumed by one client.
D. The limit of how many clients can consume a single JMS queue message is determined by the prefetch configuration.
**Correct Answers: C**

9: What is used to add a host machine to a TIBCO Administrative Domain?
A. corporate LDAP
B. TIBCO Domain Utility
C. TIBCO Administrator GUI
D. TIBCO Administrator Installer

Correct Answers: B

10: Which is a valid technique for preventing unauthorized users from triggering a process flow?
A. lock down all process flows using transport specific security mechanisms
B. lock down the Starter activity at the transport level via transport specific security
C. supply a User ID and password when logging into a BusinessWorks Process Engine
D. prevent each BusinessWorks process flow from unauthorized access by assigning a role to it

Correct Answers: B

11: Your organization has created a standard for organizing TIBCO BusinessWorks projects. Which is most suited to this task?
A. TIBCO Adapters
B. TIBCO PortalBuilder
C. TIBCO Domain Utility
D. TIBCO Designer templates

Correct Answers: D

12: Which two messaging protocols can be used to communicate between a BusinessWorks process and a TIBCO Adapter? (Choose two.)
A. SOAP
B. RosettaNet
C. Rendezvous
D. Message Queues
E. Java Message Service

Correct Answers: C E

13: Which statement is true about JRE requirements for installing TIBCO BusinessWorks components?
A. A JRE must be installed prior to installing TIBCO BusinessWorks components.
B. No JRE is needed or used during the installation of TIBCO BusinessWorks components.
C. All installed JREs must be uninstalled prior to installing TIBCO BusinessWorks components.
D. All TIBCO BusinessWorks component installers can use a preinstalled JRE or its own embedded JVM.

Correct Answers: D

14: You need to perform data conversion on a sequence of elements in a business event schema, but it is not part of the TIBCO XPATH implementation. How do you solve this problem in the most efficient manner?
A. TIBCO BusinessWorks does not support the feature.
B. You implement an adapter to expand the function set.
C. You write a Java Custom activity to handle the business event data.
D. You create a Java Custom function to handle the business event data.

**Correct Answers: D**

15: How does BusinessWorks support the External Transformation Model?
A. BusinessWorks requires users to create their own XSD transformation engine.
B. BusinessWorks allows XML transformation to take place as part of every activity.
C. BusinessWorks allows users to visually express multi-pass document transformations as transitions.
D. BusinessWorks allows XSLT templates to be imported and executed as part of a process flow’s definition.

**Correct Answers: D**
